INTERIM COMMERCIAL ITEM DESCRIPTION

CALCITONIN-SALMON INJECTION

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-ATT, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

This Interim Commercial Item Description covers Calcitonin-Salmon Injection for use in treatment of Paget's Disease.

Salient Characteristics:

Shall be Calcitonin-Salmon Injection.

Shall contain 200 I.U. of Calcitonin-Salmon per ml within the applicable assay limits for the injection.

Shall be suitable for Subcutaneous and Intramuscular use.

Not less than 15 months of the expiration dating period shall remain at time of delivery to the Government.

Workmanship. Injection shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Vial (VI). One vial containing 2 ml, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.
