COMMERCIAL ITEM DESCRIPTION

BAG, URINE COLLECTION, PEDIATRIC

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers a sterile, single specimen, disposable, pediatric urine collection bag.

Salient characteristics:

The closed system type unit shall be a sterile, disposable, 200 ml single specimen bag, suitable for the collection of urinary output without disagreeable odor or external contamination.

The bag shall be fabricated from soft pliable plastic material and sufficiently clear to readily permit visualization of flow and contents.

The bag shall be double chambered with a flexible hypo-allergenic adhesive patch for securing between the thighs to protect against fecal contamination. It shall be configured to fit male or female patients without undue restrictions to patient movement.

The double chambered bag shall contain a one-way valve to prevent splash back against the skin and will have a practical capacity of 200 ml (approximately 3-1/2 inches wide by 8-1/4 inches long (8.89 cm by 20.95 cm).

A drain shall be provided at the bottom of the chambered bag to facilitate aseptic withdrawal of urine which permits drainage without removal from child.

Bag shall be fabricated in a manner that permits the removal, sealing and specimen transfer to laboratory without danger of spill or contamination.

Each urine collection bag shall be suitably overwrapped to maintain sterility of contents until manually opened.

Each package of 100 urine collection bags shall include simple illustrated instructions for use.

Workmanship. The pediatric urine collection bag shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package containing one hundred pediatric urine collection bags, each bag individually packaged sterile in a peel-open type container, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U. S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

The following National Stock Number is covered by this document:

6530-01-099-0364

Ordering data. Intermediate/exterior package quantities and labeling and marking must be specified in the contract and/or order.
