INTERIM REVISION OF
MIL-A-37610
23 June 1978

INTERIM COMMERCIAL ITEM DESCRIPTION

ASPIRIN, ALUMINUM HYDROXIDE GEL, DRIED, AND MAGNESIUM HYDROXIDE TABLETS

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-ATT, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

The General Services Administration has authorized the use of this Interim Commercial Item Description as a valid exception to MIL-A-37610, dated 23 June 1978.

This Interim Commercial Item Description covers Aspirin, Aluminum Hydroxide Gel, Dried, and Magnesium Hydroxide Tablets for use as an analgesic.

Salient Characteristics:

Shall be Aspirin, Aluminum Hydroxide Gel, Dried, and Magnesium Hydroxide Tablets.

Shall be tablets containing 325 mg of Aspirin, 75 mg of dried Aluminum Hydroxide Gel, and 75 mg of Magnesium Hydroxide per tablet within the designated assay limits for the tablets.

Shall assay to contain not less than 95.0 percent and not more than 105.0 percent of the required amount of aspirin per tablet when determined by a suitable, accurate, and reproducible method.

FSC 6505

DISTRIBUTION STATEMENT A. Approved for public release, distribution is unlimited.

Shall assay to contain not less than 90.0 percent and not more than 110.0 percent of the required amount of dried Aluminum Hydroxide Gel and Magnesium Hydroxide per tablet when determined by a suitable, accurate, and reproducible method.

Shall assay to contain not more than 3 percent free Salicylic Acid based on the labeled aspirin content per tablet when determined by a suitable, accurate, and reproducible method.

Friability. The tablets shall lose not more than 0.8 percent of their weight, when tested as follows:

Randomly select 50 tablets which show no physical defects. Free them from adhering dust by blowing with a stream of dry air. Accurately weigh the 50 tablets and place them into a one quart mason jar. Place the jar in a shaker (3-way Laboratory Mixer, American Stoneware Co., or equal), which will rotate the jar end over end at 24 revolutions per minute for 6 minutes. After rotating, remove the tablets and free them from all fragments and dust with the use of a stream of dry air. Accurately weight the tablets and determine the loss in weight.

Calculate the percent loss in weight.

Not less than 32 months of the expiration dating period shall remain at time of delivery to the Government.

Workmanship. Tablets shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Bottle (BT). One bottle containing 500 tablets, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

For information only. The following product, as of the date of this document, is purported by the following company to meet the salient characteristics of the item described herein:

WILLIAM H. RORER, INC. - Ascriptin
