COMMERCIAL ITEM DESCRIPTION

TRAY, CRUET, COMMUNION

The General Services Administration has authorized the use of this commercial item description in preference to item 3 of MIL-F-43381.

1. SALIENT CHARACTERISTICS

1.1 Design and construction. The tray shall be fabricated of either a lime or lead flint glass and may be hand made or machine made. The tray shall be oval in design and measure approximately 9-1/4 inches in length and 5-1/2 inches in width. The inner bowl shall be approximately 6 inches in length with a approximate depth of 11/16 inch. All dimensions shall have a tolerance of ± 1/32 inch. The tray shall have raised religious lettering (IHS) with a cross on the underside.

2. QUALITY ASSURANCE

2.1 Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same as the product offered for sale in the commercial marketplace. When specific quality assurance provisions are specified for any commercial characteristic the contractor shall furnish data resulting from inspection conducted in accordance with the specific quality assurance provisions. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

3. PACKAGING

3.1 Packaging. Each tray shall be wrapped in flexible cellular plastic film (bubble pack) or at least two thicknesses of tissue paper. Each tray shall be placed in a snug-fitting corrugated fiberboard box, style optional. The corrugated fiberboard shall have a minimum bursting strength of 125 pounds.

FSC 9925

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

3.2 Packing. Twelve trays, packaged as specified, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, type CF, (variety SW) or SF, class domestic, grade 275 of PPP-B-636. Each shipping container shall be of a size that can be palletized in accordance with MIL-STD-147. Each shipping container shall be closed in accordance with the appendix of PPP-B-636.

3.3 Palletization. When specified (see 4.2), trays packed as specified, shall be palletized in accordance with load type Ia of MIL-STD-147. Each prepared load shall be bonded with primary and secondary straps in accordance with bonding means K and L, or film bonding means O or P. Pallet pattern shall be in accordance with the appendix of MIL-STD-147. Interlocking of loads shall be effected by reversing the pattern of each course.

3.4 Marking. Marking shall be in accordance with MIL-STD-129. In addition to the fragile markings specified in MIL-STD-129, the top of each container shall be plainly marked in capital letters, not less than 3/4 inch in height, as follows:

GLASS
HANDLE WITH CARE

4. NOTES

4.1 Intended use. The cruet communion tray is intended for Chapel use by the Army, Navy, and Air Force Chaplains under noncombat conditions.

4.2 Ordering data.

a. Title, number, and date of this document.
b. When palletization is required (see 3.3).
