COMMERCIAL ITEM DESCRIPTION

COMMUNION SET, INDIVIDUAL CUP TYPE

The General Services Administration has authorized the use of this commercial item description in preference to MIL-C-43437.

1. SALIENT CHARACTERISTICS

1.1 Design and construction. The communion set shall be fabricated of chromium plated brass. All surfaces shall be brass, chromium plated. The communion set shall consist of the following: 1 base measuring approximately 12 inches in diameter; three (3) tray assemblies consisting of one tray base measuring approximately 12 inches in diameter to accommodate 1 cup holder. The cup holder shall have the capacity to hold forty (40) communion cups; the cup holder should approximate 10 inches so as to fit the tray base; 1 cover measuring approximately 11 inches in diameter and include a removable cross at the center. The height of the cover with the cross shall approximate four inches. There shall be three (3) patens measuring approximately 10 inches in diameter.

2. QUALITY ASSURANCE

2.1 Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same as the product offered for sale in the commercial marketplace. When specific quality assurance provisions are specified for any commercial characteristic the contractor shall furnish data resulting from inspection conducted in accordance with the specific quality assurance provisions. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

3. PACKAGING

3.1 Packaging. Each component of the communion set shall be individually inserted into a clear plastic bag. Prior to enclosing the cover in plastic, the cross shall be removed and reinserted so that it is on the inside of the cover.

Check the source to verify that this is the current version before use.

Each bagged component shall be placed into a FOL-style fiberboard box. The box shall be constructed of corrugated fiberboard with a minimum bursting strength of 200 pounds. The approximate inside dimensions of each box shall be 14-1/2 inches in length, 4-1/2 inches in width and 14-1/2 inches in depth. Approximate dimensions are furnished as a guide only.

3.2 Packing. One complete communion set shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, type CF, (variety SW) or SF, class domestic, grade 275 of PPP-B-636. The approximate inside dimensions of the container shall be 29 inches in length, 18 inches in width and 14-1/2 inches in depth. Approximate dimensions are furnished as a guide only.

3.3 Palletization. When specified (see 4.2), communion sets shall be palletized on a 4-way entry pallet in accordance with load type Ia of MIL-STD-147. Each prepared load shall be bonded by means K and L, or O or P, and pallet pattern shall be number 1 in accordance with MIL-STD-147.

3.4 Marking. In addition to any special markings required by the contract or purchase order, unit packs, shipping containers and unitized pallet loads shall be marked in accordance with MIL-STD-129.

4. NOTES

4.1 Intended use. The communion set is intended for use in Chapels during Protestant Communion Services.

4.2 Ordering data.

a. Title, number, and date of this document.
b. When palletization is required (see 3.3).
