COMMERCIAL ITEM DESCRIPTION

# WAX, MACHINE STITCHING

The General Services Administration has authorized the use of this commercial item description in preference to MIL-W-43061.

## 1. SALIENT CHARACTERISTICS

1.1 Composition. The stitching wax shall be made from a combination of waxes, rosin, pitch, tar, and any other similar materials. The consistency of the wax shall be such that its softening point is 115° to 130°F when tested in accordance with ASTM E 28. The wax shall not have a rancid odor when tested in accordance with ASTM D 1833 except that in lieu of a numerical rating, a rancid odor shall be determined to exist if one or more panel mambers report it as such. The product shall be non-injurious to health during manufacturing operations or end-item application. The wax which serves as a lubricant and waterproofing method, shall have no deleterious effect on the leather or thread used in the manufacture or repair of footwear.

1.2 Color. The color of the wax shall be black, white, brown, or gold as specified.

1.2.1 Part identification number. The part identificaiton number shall consist of the commercial item description number and the color number as follows:

A-A-50178 - 1

- 1: Color number: 1 = Black, 2 = White, 3 = Brown, 4 = Gold
- A-A-50178: Commercial item description number

1.3 Workmanship. The finished wax shall be clean and homogeneous in appearance.

## 2. QUALITY ASSURANCE

2.1 Certification. The contractor shall certify that the product offered meets the salient characteristics of the description, conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same as the product offered for sale in the commercial marketplace. When specific quality assurance provisions are specified for any commercial characteristic the contractor shall furnish data resulting from inspection conducted in accordance with specific quality assurance provisions.

Check the source to verify that this is the current version before use.

The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

3. PACKAGING

3.1 Packaging. The wax shall be wrapped and packaged in 1-pound units in accordance with commercial practice.

3.2 Packing. Fifty packages of wax shall be compactly packed in a fiberboard shipping container conforming to RSC-L, type CF (variety SW) or SF, class domestic, grade 275 of PPP-B-636.

3.3 Palletization. When specified (see 4.2), the wax, packed as specified, shall be palletized on a 4-way entry pallet in accordance with load Ia of MIL-STD-147. Each load shall be bonded by means K and L, or film bonding means O or P in accordance with MIL-STD-147.

3.4 Marking. In addition to commercial markings, unit packs, shipping containers and palletized loads shall be marked in accordance with MIL-STD-129.

4. NOTES

4.1 Intended use. The wax is intended to coat thread that is used in the manufacture and repair of footwear.

4.2 Ordering data.

a. Title, number, and date of this document.
b. Color of wax required (see 1.2).
c. Level of packing required (see 3.2)
d. When palletization is required (see 3.3).

4.3 Source of government documents. Copies of military and Federal documents are available from:

Naval Publications and Forms Center
5801 Tabor Avenue
Code 1061
Philadelphia, PA 19120-5099

4.3.1 Sources for nongovernment associations documents.

ASTM D 1833 - Method of Test for Odor of Petroleum Wax
ASTM E 28 - Method of Test for Softening Point by Ring and Ball Apparatus

(Application for copies should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.)
