4. GENERAL REQUIREMENTS

4.1 Objective. The display of warfighting symbology has evolved from a static, manual operation to include fully automated computer generation. This evolution has resulted in the fielding of many system-specific symbology implementations by the CINCs/Services/Agencies (C/S/As) to meet the mission requirements of the warfighter. The "C4I for the Warrior" concept, signed by the Chairman of the Joint Chiefs of Staff in June 1992, brings together C4I functions to provide the warfighter with a seamless, real-time, true representation of the battlespace. The standardization of warfighting symbology shall play an integral role in achieving interoperability during joint service operations. While the primary focus of this standardization is the electronic generation of symbology, this effort must also support those mission requirements where symbology is hand-drawn by the warfighter. In addition, this standard is designed so that all essential symbology information can be communicated to the warfighter on either a monochrome (i.e., black, white, or single color) or multicolor-capable display.

4.2 Organization. The purpose of warfighting symbology is to convey information about objects in the warfighter battlespace. This chapter defines the general requirements for the two types of warrior symbology: icon-based symbols and tactical graphics. This chapter also provides an overview of symbology modifiers and identifiers and addresses the use of alternative symbology sets.

4.3 Icon-based symbols. An icon-based symbol is composed of a frame (geometric border), fill, and icon, as shown in figure 2.

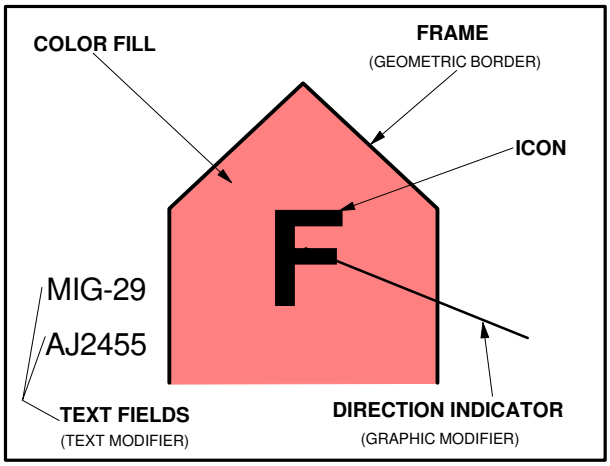

FIGURE 2. Symbol components.

4.3.1 Frame. The frame is the geometric border of a symbol which, when displayed, provides an indication of the affiliation, battle dimension, and status of a warfighting object. The frame is the border of the symbol and does not include associated material inside or outside of the border. The frame serves as the base to which other symbol components and modifiers are added. Though sometimes optional, in most cases a frame surrounds an icon.

4.3.2 Fill. The fill is the interior area within a symbol. If the fill is assigned a color, it provides redundant information about the affiliation of the object. If color is not used, the fill is transparent.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T08:00Z
Check the source to verify that this is the current version before use.

4.3.3 Icon. The icon is the innermost part of a symbol which, when displayed, provides an abstract pictorial or alphanumeric representation of a warfighting object. The icon portrays the role or mission performed by the object. This standard distinguishes between icons that must be framed or unframed and icons where framing is optional. Information about framing is provided in paragraph 5.3.3 and appendix C; framing requirements for individual icons are presented in appendix D.

4.4 Tactical graphics. Tactical graphics provide operational information that cannot be presented via icon-based symbols alone. These graphics portray unit boundaries, special area designations, and other unique markings related to battlespace geometry and necessary for battlefield planning and management (see appendix E).

4.5 Symbol modifiers. A modifier is an optional text field or graphic indicator that provides additional information about the associated symbol or tactical graphic. This standard defines various types of modifiers and indicates where each is to be placed in relation to a symbol or tactical graphic, see 5.5.

4.6 Symbol ID code. A symbol ID code is an alphanumeric code that can be used to transfer the information required to generate and display symbols and tactical graphics. The coding scheme used in this identifier is explained in detail in appendix B.

4.7 Use of special symbol sets. While the symbology provided in this standard is intended to address the C4I information needs of the warfighter, it is expected that information from other operational domains will need to be displayed in order to accurately portray the battlespace. Many of these other domains have published symbology standards or other documents addressing information requirements that parallel the ones addressed here. Although these other domains are outside the scope of the current document, it is desirable to make the symbology that they publish available with the current document. As a result, appendix F contains symbology of potential interest to the users of the document. The content of this appendix is maintained by an operational community other than the SSMC and is not under configuration management by this group. The symbology included in appendix F is not harmonized with the current standard and may be inconsistent with the requirements concerning warfighting symbology presented here.

Check the source to verify that this is the current version before use.

taxonomy was organized hierarchically, the detailed information it contained provided a logical structure from which to generate a set of icons representing warfighting objects. The information hierarchy is presented in appendix A, and the mapping of warfighting icons to the hierarchy is included in appendix D. The icons in appendix D shall be used whenever a system displays any of the warfighting objects for which an icon is provided. Not all information about objects can be related to a specific affiliation or battle dimension; therefore, it is possible to have an object represented by an icon alone. Appendix D indicates whether an icon shall be framed or unframed or whether framing is optional. Military ships, both sea surface and subsurface, military aircraft, military units, and installation icons are always associated with an affiliation and battle dimension and so shall be framed. Only those icons specifically identified as unframed or frame optional shall be displayed without a frame.

5.4. Tactical graphics. Tactical graphics include tasks, control measures, points, lines, areas, aviation maneuver graphics, deception graphics, offense maneuver graphics, special maneuver graphics, mobility/survivability, fire support graphics, combat service support, command and control, and operations other than war, and can be combined with icons and symbol modifiers to display operational information. The definition and placement of tactical graphics are addressed in appendix E. The graphics in this appendix shall be used whenever a system displays any of the operational information for which a graphic is provided. Default color for tactical graphics will be black or white, depending on display background.

5.5 Symbol modifiers. The field title, description, and maximum length of allowable modifiers are presented in table III, and the default placement of modifiers in fields around the symbol or tactical graphic is shown in figures 3a through 3c. Figure 3a addresses units, installations, and equipment; the placement of modifiers in this figure applies to all units regardless of battlespace dimension. Figure 3b applies to points, areas, lines, and boundaries. Figure 3c addresses NBC events. In figure 3b, certain fields can be displayed more than once within a graphic. The unnumbered fields should be filled before the numbered fields, (i.e., fields W, H, and T should be used before fields W1, H1, and T1). As indicated in table III, not all modifiers are applicable to all symbols or graphics. However, when any modifier is displayed, it shall be defined in accordance with the contents of this table and positioned in accordance with figures 3a through 3c. When transmitted to other systems, symbols and their modifiers can be exchanged using the USMTF GRAPHREP Message.

TABLE III. Symbol modifier field definitions (cont'd).

Field	Field Title	Description	Units	Equipment	Installations	Points	Areas	Lines	Boundary Lines	Nuclear	Bio	Chem	Field Type
X	Altitude/Depth	Altitude portion of GPS; Flight level for aircraft. Depth for submerged objects; Height in feet of equipment or structures on the ground	6	6	6	-	-	-	-	6	6	6	T
Y	Location	Latitude and longitude	19	19	19	19	19	19	19	19	19	19	T
Z	Speed	Speed (refer to MIL-STD-6040 for abbrevations)	8	8	8	-	-	-	-	-	-	-	T
AA	Special C^2 headquarters	Name of a special C^2 headquarters	9	-	-	-	-	-	-	-	-	-	T/G
AB	Feint/Dummy indicator	Bracket placed over a unit to show that it is a feint or dummy unit	G	G	G	-	-	-	-	-	-	-	G

Footnote: a. Dash (-) inside boxes indicates nonapplicable.

b. Field J, Evaluation Rating: RELIABILITY RATINGS: **A**-completely reliable, **B**-usually reliable, **C**-fairly reliable, **D**-not usually reliable, **E**-unreliable, **F**-reliability cannot be judged. CREDIBILITY RATINGS: **1**-confirmed by other sources, **2**-probably true, **3**-possibly true, **4**-doubtfully true, **5**-improbable, **6**-truth cannot be judged. The scale 1 to 6 does not represent progressive degrees of accuracy. Recognition must be given to the rating represented by the numeric symbol. Although both letters and numerals are used to indicate the evaluation of an item of information, they are independent of each other. (See FM 34-3, Intelligence Analysis, March 1990, pages 2-13 through 2-17 for complete definitions of evaluation ratings.)

c. Field Type: T = text; G = graphic.

d. Field Y: WGS - 84 is a mandated standard (MIL-STD 2401) which allows an unambiguous representation of positional information. Many mapping, charting, and geodetic products produced by other agencies and governments are not referred to the WGS - 84. Parameters to transform these products to WGS - 84 are part of this standard.

5.5.1 Indicators. Indicators can be used with both framed and unframed symbols and with tactical graphics. An example of each type of symbol modifier is given in figure 4. Implementation guidance, where available, is provided in appendix C.

5.5.1.1 Direction of movement. The direction of movement indicator is an arrow or staff identifying the direction of movement or intended movement of an object. This indicator is identified as field Q in table III and positioned as shown in figures 3a, 3c, and 4. For land symbols, the indicator is a bent arrow extending downward from the bottom center of the frame or icon and pointing in the direction of movement (see figures 3a and 4). For all other symbols, the indicator is an arrow extending from the center of the frame or icon and pointing in the direction of movement (see figure 3a). For NBC events, the indicator is one or two lines indicating the downwind direction (see figure 3c).

5.5.1.2 Size/mobility. The size indicator provides a graphic representation of size, as shown in table IV. It is identified as field B in table III and positioned as shown in figures 3a, 3c, and 4. Size indicators are also used in tactical graphics, as discussed in appendix E. Indicator codes for size are listed in appendix B. The mobility indicator indicates the mobility of an object, as shown in figure 4, and is used for equipment only. This indicator identifies mobility other than that intrinsic to the equipment itself. For example, the symbol for a self-propelled howitzer moving by train would include a railway mobility indicator, while the symbol for a tank or other tracked vehicle would not contain any mobility indicator. The mobility indicator is identified in field R of table III and depicted as shown in figures 3A and 4.

TABLE IV. Size /mobility.

Indicator	Description
∅	Team/Crew
•	Squad
••	Section
•••	Platoon/Detachment
I	Company/Battery/Troop
II	Battalion/Squadron
III	Regiment/Group
X	Brigade
XX	Division
XXX	Corps

TABLE IV. Size/mobility (cont'd).

Indicator	Description
	Installation
	Task Force
	Feint/Dummy
	Headquarters staff

5.5.1.3 Headquarters staff. The headquarters staff indicator identifies a unit as a headquarters. The indicator is a line extending downward from the left side of the frame. This indicator is identified as field S in table III and positioned as shown in figures 3a and 4. The indicator may be extended in special circumstances to indicate a new or newly named C2 headquarters. This special indicator is identified as field AA and positioned as shown in figure 5.

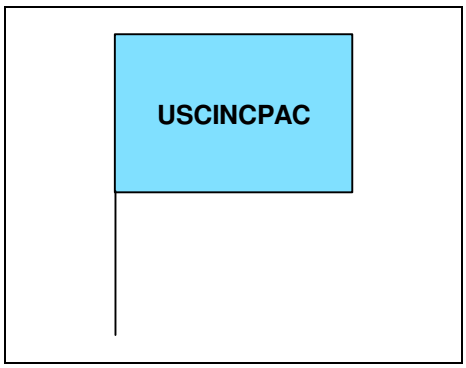

FIGURE 5. Special C^2 headquarters symbol.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T08:00Z
Check the source to verify that this is the current version before use.

5.5.1.4 Task force. The task force indicator identifies units as a task force. It is represented by a bracket in field B as shown in figures 3a and 4. Task force codes are provided in appendix B.

5.5.1.5 Location. Objects shall be located in accordance with paragraph 5.6.3. The location offset indicator is used when placing an object away from its actual location. This indicator is a line extending downward from the left side of a frame or icon, with the end point of the line indicating the location of the symbol. This indicator is identified as field S in table III and positioned as shown in figures 3a and 4. Actual location (field Y) is given in latitude and longitude.

5.5.1.6 Feint/dummy. The feint or dummy indicator identifies an offensive or defensive unit intended to draw the enemy's attention away from the area of the main attack. The indicator is depicted in figure 4 and represented in field AB.

5.5.2 Text. Table III defines the specific content of each text-based symbol modifier. Air/space and sea track numbers are included in field T and positioned as shown in figures 3a through 3c. Staff comments and additional information are contained in fields G and H, with the content of these fields being implementation-specific so long as the maximum number of characters in each field is not exceeded.

5.6 Display. The following rules relate to the construction of warfighting symbology and apply to those display requirements necessary to achieve interoperability in joint service operations. Additional guidance concerning symbology implementation is provided in appendix C.

5.6.1 Symbol display options. C4I systems differ in their operational requirements concerning the amount of information about a warfighting object that needs to be displayed. As a result, this document standardizes those symbology elements required to achieve interoperability in information presentation, but allows flexibility in the symbol components and modifiers that are displayed to the warfighter. Display options available range from complex (i.e., symbols include frame, fill, and icon) to primitive (i.e., symbols rendered as dots that denote the presence of an object at a specific location). Table V provides examples of display options that can be used in color and monochrome displays and can either be hand-drawn or computer-generated. Systems can select one or more display options for implementation based on operational requirements and display capabilities. If multiple options are available, the warfighter may be allowed to choose a single option for rendering all symbols or to select different options based on the affiliation or battle dimension of the object and the amount of information required. For example, the warfighter may choose to display minimal information about friendly objects (displaying these symbols as dots) and maximal information about potential threats (displaying these symbols with frame, fill, and icon).

5.6.2 Arrangement of symbol modifiers. When symbol modifiers are displayed, the symbol itself should be centered within field A (see figure 3a), and the position of all modifiers should remain the same whether the symbol is framed or unframed. While the relative placement of the fields should be maintained, implementation and size constraints within a system may require fields to be offset or not displayed. Text modifiers placed to the left of the symbol should be right justified, and text placed to the right should be left justified. When multiple text modifiers are displayed in a single field (e.g., E/F or J/K/L/N/P), they shall be ordered as shown in figure 3a and

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T08:00Z
Check the source to verify that this is the current version before use.

separated by a single space, and the spaces assigned to unused modifiers shall be collapsed to bring the text as close to the symbol as possible. Text modifiers placed above the symbol should be bottom justified and centered. Text below a symbol should be top justified and centered.

5.6.3 Plotting. The plotting of symbols shall be based on the object's geometric center. The geometric center indicates the general vicinity of the center of mass of an object. If a location offset indicator is displayed with a symbol, the base of the indicator shall indicate the object's location. If a group of objects is displayed at one location, the group may be enclosed with a bracket and the location of that group identified with a location indicator. Other display options for reducing clutter when symbols overlap or are co-located are considered to be implementation-specific. The positional accuracy of symbology plotting is also considered implementation-specific.

5.6.4 Symbol orientation. The frame and icon in framed symbols shall be displayed in the orientation illustrated in appendix D. Equipment in the land battle dimension can be rotated to face the direction of movement only when the symbol is unframed.

TABLE V. Example of display option hierarchy.

Display Option Example	Attributes
	Frame: ON (black or white depending on background) Fill: ON (use default color indicating affiliation) Icon: ON (black or white)
	Frame: ON (use default color indicating affiliation) Fill: OFF Icon: ON (use default color indicating affiliation)
	Frame: ON (black or white depending on background) Fill: OFF Icon: ON (black or white) Comments: Default option for monochrome implementation; replace black/white with the colors available in this implementation.
	Frame: OFF (none) Fill: OFF Icon: ON (use default color indicating affiliation)

APPENDIX A

SYMBOL HIERARCHY

A.1 GENERAL

A.1.1 Scope. Appendices D, E, and F contain warrior icon, tactical graphic, and weather sets generated to support common warfighting symbology. These appendices are graphic representations of the symbol hierarchy of those sets. These appendices are a mandatory part of this standard. The information contained herein is intended for compliance.

A.2 APPLICABLE DOCUMENTS

This section is not applicable to this appendix.

A.3 DEFINITIONS

The definitions in section 3 of this standard apply to this appendix.

A.4 SYMBOL HIERARCHY

A.4.1. Common warfighting symbology hierarchy. The flowcharts representing the symbol hierarchy of those icon sets generated to support common warfighting symbology are broken down to best show individual sections of the hierarchy. Each track, space, air, ground, sea surface, sea subsurface, and special operations forces, is graphically represented to the lowest level.

APPENDIX B

SYMBOL ID CODING

B.1 GENERAL

B.1.1 Scope. A standard scheme for symbol ID coding permits information systems to display and pass information about symbols and graphics to other systems for use and display. This appendix outlines procedures for determining a symbol ID code. This appendix is a mandatory part of this standard and is required for compliance.

B.2 APPLICABLE DOCUMENTS

This section is not applicable to this appendix.

B.3 DEFINITIONS

The definitions in section 3 of this standard apply to this appendix.

B.4 SYMBOL ID CODING SCHEME

B.4.1 Symbol ID code. A symbol ID code is a 15-character alphanumeric identifier that provides the information necessary to display a symbol or graphic. Characters need not be present in all 15 positions of a code. Table B-I identifies the 9 categories of information included in a symbol ID code and the position each occupies in the 15-character identifier.

B.4.1.1 Code scheme, position 1. This position indicates the overall symbology set to which a symbol belongs.

B.4.1.2 Affiliation, battle dimension, and status, 2, 3, and 4. These positions determine the frame shape of a symbol and indicate its actual or planned location.

B.4.1.3 Function ID, positions 5 through 10. These positions identify a symbol's function, with each position providing increasing levels of detail and specialization. The specific values for these positions are included with the symbol ID codes in Tables B-III through B-X.

B.4.1.4 Size/mobility indicator code, positions 11 and 12. These positions identify the size and mobility of a symbol. Table B-II contains the specific code values used in these positions.

B.4.1.5 Country code, positions 13 and 14. These positions identify the country with which a symbol is associated. Country code identifiers are listed in Federal Information Processing Standard (FIPS) Pub 10 series.

B.4.1.6 Order of battle, position 15. This position provides additional information about the role of a symbol in the battlespace. For example, a bomber that has nuclear weapons on board may be strategic force-related, or a tactical graphic may also perform the role of a control point.

Check the source to verify that this is the current version before use.

APPENDIX B

B.4.2 Symbol ID code tables. Tables B-III through B-VIII list the codes for space, air, ground, sea surface, sea subsurface, and special operations symbols, respectively. Tables B-IX and B-X list the codes for tactical and weather graphics. In each table, an alphanumeric character indicates the known value for that position for a given symbol. An asterisk (*) indicates a position that is defined by the user based on specific symbol circumstances. A dash (-) indicates that no information is provided in the position.

TABLE B-I. Symbol ID code positions and categories.

CODING SCHEME (1) (POSITION 1)	AFFILIATION (1) (POSITION 2)	BATTLE DIMENSION (1) (POSITION 3)	STATUS (1) (POSITION 4)
S - WARFIGHTING G - TACTICAL GRAPHICS W - WEATHER I - INTELLIGENCE M - MAPPING (reserved - under development)	P - PENDING U - UNKNOWN A - ASSUMED FRIEND F - FRIEND N - NEUTRAL S - SUSPECT H - HOSTILE J - JOKER K - FAKER O - NONE SPECIFIED	P - SPACE A - AIR G - GROUND S - SEA SURFACE U - SEA SUB-SURFACE F - SOF X - OTHER T - TASKS C - CONTROL MEASURES O - OPERATIONS OTHER THAN WAR	A -ANTICIPATED/PLANNED P - PRESENT

TABLE B-I. Symbol ID code positions and categories (cont'd).

FUNCTION ID (6) (POSITION 5 - 10)	SIZE/MOBILITY (2) (POSITION 11, 12)	COUNTRY CODE (2) (POSITION 13, 14)	ORDER OF BATTLE (1) (POSITION 15)
See tables B-III through B-VIII for specific values.	See Table B-II for specific values	See FIPS Pub series 10	A - AIR OB E - ELECTRONIC OB C - CIVILIAN OB G - GROUND OB N - MARITIME OB S - STRATEGIC FORCE RELATED X - CONTROL MARKINGS

the following display rules apply:

(1) Implementations shall not modify the frame shapes defined in this standard to indicate affiliation, battle dimension, and status.

(2) Implementations shall use the default frame colors defined in this standard to indicate affiliation. If differentiation is needed within an affiliation category, additional colors should be used (i.e., for the frame or color fill) within that category, but the default colors for the other affiliations should not be changed. Hardware permitting and unless specifically prohibited by system specification for operational reasons, implementation of this standard should provide for operator control of color to the individual icon level. The intent is maximum operational flexibility in those situations where the basic default colors are not sufficient for ready discrimination (i.e. multiple hostiles which must be differentiated from each other) and to assign a specific color to a special interest target without reference to its affiliation.

(3) Implementations needing to display additional role or mission information about a warfighting object should use the icons in appendix D as the basis from which to create any temporary symbols. Figure C-4 presents some of the graphic extensions that can be added to these icons. Whenever possible, the basic representation of the icon should not be altered; a graphic extension should be an addition to the basic icon and positioned to ensure that overall symbol legibility is not degraded. Figure C-4 provides an example of how the basic icon is combined with an extension to produce a temporary symbol.

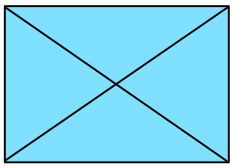

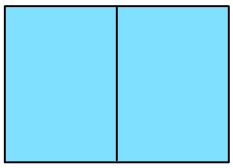

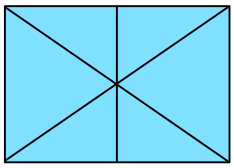

Basic symbol	Icon extender	Extended symbol
		
Infantry	Motorized modifier	Motorized infantry

FIGURE C-4. Extending the symbol.

C.4.5 Line width. Because the symbol frame indicates both the affiliation and battle dimension of an object, it is critical that line width be sufficient to ensure frame legibility and discriminability at normal viewing distance. The optimum line width may differ depending on frame size and be affected by whether the frame is filled or unfilled or displayed in color or black/white. Usability testing should be performed to identify the optimum rendering for a given implementation.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T08:00Z
Check the source to verify that this is the current version before use.

C.4.6 Color. It is important that implementations maximize the contrast between symbols and the display background in order to provide optimum discriminability. In general, this contrast can be provided by using black for the frame, icon, and modifiers when symbols are displayed on a light background, and using white for these elements when symbols are displayed on a dark background. Implementations choosing to display a color fill shall also display the appropriate icon from table D-1 within the symbols. Implementors should select specific values (e.g., in CIE or RGB terms) for the default colors in table C-II based on considerations such as operational requirements, hardware configuration, display background, and viewing conditions (e.g., ambient lighting). If a symbol includes a frame and an icon, both components, as well as others, should be the same color (e.g., black, white, or one of the default colors indicating affiliation). Implementors should comply with color guidance provided in the *DOD Human Computer Interface (HCI) Style Guide* and include sufficient usability testing to ensure effective operator performance when using the symbology. While color coding shall be the same throughout an implementation, color saturation may need to vary depending on the display option(s) selected. For example, to ensure optimum symbol discriminability, different shades of red may be needed in a frame-only symbol as compared to the color fill in a symbol with a black frame and icon.

TABLE C-II. Default colors.

Description	Hand-Drawn	Computer Generated	
		ICON (RGB Value)	FILL (RGB Value)
Friend, Assumed Friend	Blue	Cyan (0, 255, 255)	Crystal Blue (128, 224, 255)
Unknown, Pending	Yellow	Yellow (255, 255, 0)	Light Yellow (255, 255, 128)
Neutral	Green	Neon Green (0, 255, 0)	Bamboo Green (170, 255, 170)
Hostile, Suspect, Joker, Faker	Red	Red (255, 0, 0)	Salmon (255, 128, 128)
Weather	Purple	Plumb Red (128, 0, 128)	Light Orchid (226, 159, 255)
Weather	Brown	Safari (128, 98, 16)	Khaki (210, 176, 106)
Boundaries, lines, areas, text, icons, and frames	Black	Black (0, 0, 0)	Black (0, 0, 0)

TABLE C-II. Default colors (cont'd).

Description	Hand-Drawn	Computer Generated	
		ICON (RGB Value)	FILL (RGB Value)
(See note)	White	White (255, 255, 255)	Off-White (6% Grey) (239, 239, 239)

Note: Off-white (vice black) may be used as the default color depending on the background for boundaries, lines, areas, text, icons, and frames.

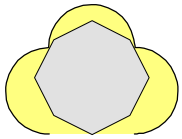

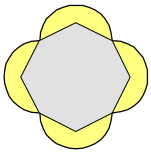

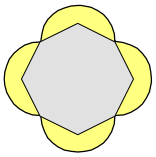

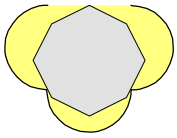

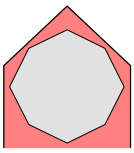

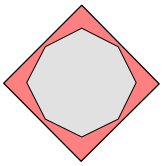

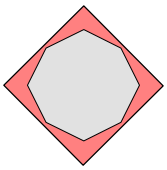

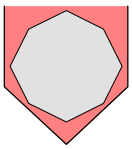

C.4.7 Icon placement within frames. The geometric center of the icon should be placed at the geometric center of the frame, as shown in table C-III, except in the hostile, friend, assumed friend, faker, joker, and suspect open frames. In these frames, the geometric center of the icon should be placed one-third of the way down the vertical axis starting from the open end, as shown in table C-III.

TABLE C-III. Icon placement.

APPENDIX E

TACTICAL GRAPHICS

E.1 GENERAL

E.1.1 Scope. This section provides operational information in the form of tactical graphics related to battlespace geometry. These graphics are necessary for battlefield planning and management, but cannot be presented as icon-based symbols alone. This appendix is a mandatory part of this standard. The information contained herein is intended for compliance.

E.2 APPLICABLE DOCUMENTS

This section is not applicable to this appendix.

E.3 DEFINITIONS

The definitions in section 3 of this standard apply to this appendix.

E.4 WARFIGHTING SYMBOLOGY

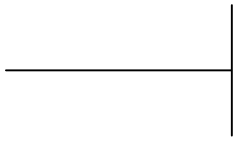

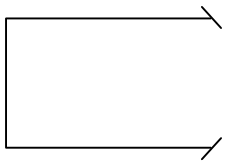

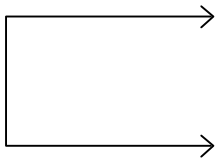

E.4.1 Battlespace geometry. Battlespace geometry includes tasks, control measures, points, areas, lines, aviation maneuver graphics, deception graphics, offense maneuver graphics, special maneuver graphics, mobility/survivability, fire support graphics, combat service support, command and control, and operations other than war, along with the symbols/icons presented in the standard including the use of text and indicators to convey operational information which cannot be presented via symbols/icons alone. The rules for generation and display, including optional use of color, follow the guidelines presented previously unless stated otherwise in this section. The ID coding is presented in appendix B. Battlespace geometry codes used in symbol ID code position 3, Battle Dimension are T (tasks), C (control measures), and O (operations other than war).

NOTE: The numbers displayed within the battlespace graphics are used as examples and not as specific parts of the graphic. They are shown to designate place holders.

APPENDIX E

TABLE E-I. Tactical graphics.

DESCRIPTION	HIERARCHY SYMBOL ID	BATTLESPACE GRAPHIC
Tactical Graphics	2.X	
Tasks	2.X.1	
Task Graphics	2.X.1.1	
Block **1.** A tactical task assigned to a unit which requires it to deny the enemy access to a given area or to prevent enemy advance in a given direction or an avenue of approach. It may be for a specified time. Units assigned this mission may have to retain terrain and accept decisive engagement. **2.** An obstacle effect that integrates fire planning and obstacle effort to stop an attacker on a specific avenue of approach or to prevent an enemy from exiting an engagement area.	2.X.1.1.1 G*T*GB----***** Note: White filled icon represents white opaque filled icon.	
Breach A tactical task where any means available are employed to break through or secure a passage through an enemy defense, obstacle, minefield, or fortification.	2.X.1.1.2 G*T*GH----*****	
Bypass A tactical task which involves maneuvering around an obstacle, position, or enemy force to maintain the momentum of advance. Bypassed obstacles and enemy forces are reported to higher HQ.	2.X.1.1.3 G*T*GY----*****

DESCRIPTION	HIERARCHY SYMBOL ID	BATTLESPACE GRAPHIC
Brigade Support Area (BSA) A designated area in which combat service support (CSS) elements from division support command (DISCOM) and corps support command (COSCOM) provide logistic support to a brigade. The forward support battalion (FSB) manages the terrain and unit locations.	2.X.2.4.3.5.1 G*C*SATB--***** 2.X.2.4.3.5.2 G*C*SATD--*****	
Division (DSA) An area normally located in the division rear and often positioned near air landing facilities along the main supply route (MSR). The DSA contains the portions of the division rear command post, DISCOM CO and units organic and attached to the DISCOM. It may also contain COSCPM units supporting the division.		
Regimental (RSA)	2.X.2.4.3.5.3 G*C*SATR--*****	
Command and Control The exercise of authority and direction by a properly designated commander over assigned forces in the accomplishment of the mission. Command and control functions are performed through an arrangement of personnel, equipment, communications, and procedures employed by a commander in planning, directing, coordinating, and controlling forces and operations in the accomplishment of a mission.	2.X.2.5	
Special Point	2.X.2.5.1 G*C*OX----*****

DESCRIPTION	HIERARCHY SYMBOL ID	BATTLESPACE GRAPHIC
Supply Cache	2.X.3.1.19 GHO*VZ----*****	
Locations	2.X.3.2	
Black List Location The location of the official counter-intelligence listing of actual or potential enemy collaborators, sympathizers, intelligence suspects, and other persons whose presence menaces the security of friendly forces.	2.X.3.2.1 GHO*LB----*****	
Gray List Location The location that identifies and locates those personalities whose inclinations and attitudes toward the political and military objectives of the US are obscure. May be listed on grey lists when they are known to possess information or particular skills required by US forces.	2.X.3.2.2 GHO*LG----*****	
White List Location The location that identifies and locates individuals who have been identified as being of intelligence or CI interest and are expected to be able to provide information or assistance in an existing or new intelligence area of interest. Usually in accordance with, or favorably inclined toward, US policies. Contributions are based on a voluntary and cooperative attitude.	2.X.3.2.3 GHO*LW----*****	
Operations Military actions or the carrying out of a strategic, operational, tactical, service training, or administrative military mission. The process of carrying on combat, including movement, supply, attack, defense, and maneuvers needed to gain the objectives of any hassle or any battle or campaign. Army--A broad category of related tactical activities, i.e., offense, defense, retrograde, etc.	2.X.3.3

TABLE F-I. Weather graphics (cont'd).

DESCRIPTION	HIERARCHY SYMBOL ID	WEATHER GRAPHIC
Dust or Sand Storm **1. Duststorm (DS).** An unusual, frequently severe weather condition characterized by strong winds and dust-filled air over an extensive area. Report a duststorm if the prevailing visibility is reduced to less than 5/8 miles (1,000 meters), but not less than 5/16 miles (500 meters). Report a heavy (severe) duststorm (+DS) if the visibility is reduced to less than 5/16 miles (500 meters). **2. Sandstorm (SS).** Particles of sand ranging in diameter from 0.008 inches to 1 millimeter carried aloft by a strong wind. The sand particles are mostly confined to the lowest ten feet, and rarely rise more than fifty feet above the ground. A sandstorm is reported if the prevailing visibility is reduced to less than 5/8 miles (1,000 meters), but not less than 5/16 miles (500 meters). Report a heavy (severe) sandstorm (+SS) if the visibility is reduced to less than 5/16 miles (500 meters).	3.X.9.3 W*A*OT---- *****	 (Brown)
Dust Devil Well-developed dust/sand whirls (PO). An ensemble of particles of dust or sand, sometimes accompanied by small litter, raised from the ground in the form of a whirling column of varying height with a small diameter and an approximately vertical axis. Reported regardless of the visibility.	3.X.9.4 W*A*OD---- *****	 (Brown)
Smoke (FU) A suspension in the air of small particles produced by combustion. A transition to haze may occur when smoke particles have traveled great distances (25 to 100 miles or 40 to 160 kilometers or more) and when the larger particles have settled out and the remaining particles have become widely scattered through the atmosphere. When viewed through smoke, the disk of the sun at sunrise and sunset appears very red. The disk may have an orange tinge when the sun is above the horizon. Evenly distributed smoke from distant sources generally has a light grayish or bluish appearance.	3.X.9.5 W*A*OK---- *****	 (Brown)
Haze (HZ) A suspension in the air of extremely small, dry particles invisible to the naked eye and sufficiently numerous to give the air an opalescent appearance. This phenomenon resembles a uniform veil over the landscape and subdues all colors. Dark objects viewed through this veil tend to have a bluish tinge while bright objects, such as the sun or distant lights, tend to have a dirty yellow or reddish hue. When haze is present and the sun is well above the horizon, its light may have a peculiar silvery tinge. Haze particles may be composed of a variety of substances; e.g., dust, salt, residue from distant fires or volcanoes, pollen, etc., which generally are well diffused through the atmosphere.	3.X.9.6 W*A*OH---- *****	 (Brown)

F.5 SIGNALS INTELLIGENCE (SIGINT) SYMBOLOGY

The following graphics are some of those more commonly used to depict signals intelligence and should only be used on SIGINT-related displays. These graphics must be implemented as a separate layer or classification since they may conflict with other symbols or icons used in the warrior icon set. These graphcis are based on approved symbols and icons from the SIGINT community.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1,2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.

I RECOMMEND A CHANGE:	1. DOCUMENT NUMBER MIL-STD-2525A	2. DOCUMENT DATE *(YYMMDD)* 96/11/30

3. DOCUMENT TITLE COMMON WARFIGHTING SYMBOLOGY

4. NATURE OF CHANGE *(Identify paragraph number and include proposed rewrite, if possible. Attach extra sheets as needed.)*

5. REASON FOR RECOMMENDATION

6. SUBMITTER

a. NAME *(Last, First, Middle Initial)*	b. ORGANIZATION	
c. ADDRESS *(Include Zip Code)*	d. TELEPHONE *(Include Area Code)* (1) Commercial (2) DSN *(If applicable)*	7. DATE SUBMITTED *(YYMMDD)*

8. PREPARING ACTIVITY DEFENSE INFORMATION SYSTEMS AGENCY (DISA)
