DATA ITEM DESCRIPTION

Form Approved
OMB No 0704-0188

1 TITLE	2 IDENTIFICATION NUMBER
Light Helicopter Experimental Program Accomplishment Report	DI-MGMT-80401

3 DESCRIPTION PURPOSE

3.1 The Light Helicopter Experimental Program Accomplishment Report consists of an Executive Summary, Program Summary (Volume I), Technical Summary (Volume II), and Specialties Summary (Volume III). The report provides a summary history of events and actions over the reporting period and a projection of future events.

4 APPROVAL DATE (YYMMDD)	5 OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a DTIC APPLICABLE	6b GIDEP APPLICABLE
870804	A/AMCPM-LHX		

7 APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 This Data Item Description (DID) is applicable to the Light Helicopter Experimental (LHX) Program.

8 APPROVAL LIMITATION	9a APPLICABLE FORMS	9b AMSC NUMBER
		A4167

10 PREPARATION INSTRUCTIONS

10.1 Format and Content. The Light Helicopter Experimental Program Accomplishment Report content and format shall be as follows:

10.2 EXECUTIVE SUMMARY. A three to four page summary of the events that occurred during the reporting period. The summary shall highlight the major accomplishments and shortcomings and briefly state the future plans in the program.

10.3 VOLUME I PROGRAM SUMMARY:

10.3.1 Section I - SCHEDULES AND MILESTONES:

Updated master schedules through Preliminary Flight Rating (PFR) to include original schedule of events, anticipated changes, and actual occurrences (schedule changes and variances are to be explained). Master schedule to include the major milestones and events in the following areas:

a. Engineering Development Plan.

b. Integrated Logistics Support Plan.

c. Reliability and Maintainability Plans.

d. Producibility Engineering and Planning Plan.

(Continued on Page 2)

11 DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:36Z
Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Continued)

10.3.2 SECTION II - FUTURE MEETINGS:

10.3.2.1 Listing of the projected major meetings scheduled for the next six months by month to include proposed dates, locations, and attendees (both Government and contractor) by functional areas.

10.3.2.2 Listing of all projected meetings for the next three months to include firm dates, locations, and attendees (both Government and contractor) by functional area and Point of Contact (POC) for those meetings.

10.3.3 SECTION III - PREVIOUS MEETINGS:

10.3.3.1 Synopsis and listing of all meetings held during the reporting period to include dates, locations, subjects of meetings, attendees by functional area and principal representative, short summary, and issues discussed with reference, as applicable, to action item list.

10.3.4 SECTION IV - ACTION ITEMS:

10.3.4.1 Listing of all action items generated from all meetings held during reporting period and all action items reported open from the previous reporting periods. Action items will be classified by the following areas:

a. Technical.

b. Management and Contracting.

c. Integrated Logistic Support (ILS).

d. Reliability, Availability, and Maintainability (RAM).

e. Production and Producibility, Engineering, and Planning (PEP).

f. Other.

10.3.4.2 The following information shall be included in each action item:

a. Subject.

b. Issue.

c. Action Required.

d. Reference (meeting where generated).

e. Party Responsible.

f. Party to Report to.

Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Continued)

g. Suspense Date.

h. Action Taken.

i. Status.

10.3.5 SECTION V - DATA DELIVERABLES:

10.3.5.1 Listing of all contract data deliverables submitted during the reporting peri to include data deliverables for which actions are still open from previous reporting periods. The listing shall include data required by program plans and the Contract Dat Requirements List (CDRL). The following information shall be included for each data deliverable identified:

a. Contract Data Requirements List (CDRL) Number and Contract Line Number.

b. Title, Subject, or Item.

c. When due to Government.

d. When sent by contractor.

e. When received by contracting officer.

f. Government action or disposition required (Yes or No).

g. Suspense date for Government action or disposition.

h. Remarks.

10.3.5.2 Listing of all data deliverables due the next reporting period. The listing shall include data required by program plans and CDRL. The following information shall be included for each data deliverable identified:

a. Contract Data Requirements List (CDRL) Number, Report Number, and Contract Line Number.

b. Title, Subject, or Item.

c. Due Date to Government.

10.4 VOLUME II TECHNICAL SUMMARY:

10.4.1 SECTION I - ENGINE EVALUATION AND TEST:

10.4.1.1 Summary of all full engine testing completed or on-going during the reporting period. Summary shall be broken down by engine serial number and build number. For eac engine, the following data shall be delineated:

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:36Z
Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Continued)

a. Purpose of test.

b. Test hours accumulated during the reporting period.

c. Total test hours on engine plus total test hours on Class I parts of that engine.

d. Engine configuration description to include detail changes that went on to the build being tested.

e. Description of test incidents to include causes and solutions.

f. Test results to include performance before and after test and hardware condition.

10.4.1.2 Schedule of engine test by engine serial number and build number for the next six months. For each engine, the following data is required:

a. Purpose or description of test.

b. Expected start and completion dates and test hours expected to be accumulated.

c. Expected configuration changes being incorporated on particular build.

d. Explanation of any variances from what was previously reported.

10.4.1.3 Summary and results of all flight testing of the engine on board the IHX air vehicle to include which aircraft, total engine hours on each aircraft by engine serial number, and a tracking of the failures of the engines service revealed difficulties by failure code.

10.4.2 SECTION II - ENGINE SYSTEMS STATUS/ACCOMPLISHMENTS:

Status of engine performance including technical performance measurements, weight status/summary, engine systems, etc. Status of mock-ups and engine deliverables. Summary of accomplishments on areas that address the engine system and cannot be addressed in any one component area.

10.4.3 SECTION III - ENGINE COMPONENT STATUS/ACCOMPLISHMENTS:

10.4.3.1 Status and summary of all effort performed during the reporting period on each of the major components of the engine. The engine shall be broken down by modules and subsystems in such a way that correlation can be made between this report and the Logistic Support Analysis (LSA) data being reported in other documents. At the beginning of each component status, a summary sheet shall be attached to give a quick overview of the status of that component. Each summary sheet shall include the following information:

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:36Z
Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Continued)

a. Project Number (if applicable).

b. Component name or nomenclature.

c. Logistic Control Number(s) of component and sub-components being reported.

d. Summary of scope of work to be performed during current phase of the program.

e. Effects of the design/changes on the following:

(1) Systems Specification.

(2) Engine Performance.

(3) Engine Weight.

(4) Overhaul Interval/Life Limit.

(5) Reliability of the component or sub-components.

(6) Maintainability of the component or sub-components.

The effects are to be specific when possible. Where changes and effects are reported in the summary sheet, a corresponding write-up shall appear in the body of the report. These write-ups shall explain why the change occurred, and (where applicable) explain why changes did not occur when extensive design changes have taken place.

10.4.3.2 The body of the component status report shall be broken down into the followir areas:

a. Design and Development Objectives.

b. Design Status.

c. Component Development Schedule.

d. Component Test Status and Activity.

e. Critical Parts List/System Safety Category.

f. Procurement Status.

g. Summary of Work Performed.

h. Trade-off Studies.

i. Producibility Effort Status.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:36Z
Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Continued)

j. Human Factors.

k. Manpower and Personnel Integration (MANPRINT) Efforts.

All of the above areas should report the progress and status of the effort expended during the reporting period. If no effort was expended in the area of concern than a "Not Applicable" notation will suffice.

10.5 VOLUME III SPECIALTIES SUMMARY:

10.5.1 SECTION I - RELIABILITY STATUS AND SUMMARY:

Summaries on each sub-task of the Reliability Plan shall be given. The following data in tabular form is to be delineated:

MEAN TIME BETWEEN REMOVAL STATUS

ENGINE SYSTEM REQUIREMENT = _____

LOGISTIC ** CONTROL #	PART NOMENCLATURE	ALLOCATED	PREDICTED	OBSERVED

MEAN TIME BETWEEN REMOVAL STATUS

ENGINE SYSTEM REQUIREMENT = _____

LOGISTIC ** CONTROL #	PART NOMENCLATURE	ALLOCATED	PREDICTED	OBSERVED

Where changes in the status or reliability values from the previous report occur, that changed value should be noted with an * and the reason(s) for the change must be covered in Volume II of this report.

A status of the reliability growth curve is given in this section based on the testing that was described in Volume II. Any detail schedules on the progress being made against the Reliability Plan not shown in Volume I are to be included in this section along with the progress made.

10.5.2 SECTION II - MAINTAINABILITY STATUS AND SUMMARY:

Summaries on each of the sub-tasks of the Maintainability Plan shall be given. The following data in tabular form are to be given:

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:36Z
Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Continued)

DIRECT MAINTENANCE MAN-HOUR/FLIGHT HOUR STATUS

ENGINE SYSTEM REQUIREMENT:

LOGISTIC ** CONTROL #	PART NOMENCLATURE	ALLOCATED	PREDICTED	OBSERVED

Where changes in the status or values from the previous report are given, that changed value should be noted with an * ; if the change was due to a change in the Mean Time to Repair (MTTR) of that part/component, a ** should be used. For changes in the Mean Time to Repair (MTTR), the appropriate Volume II paragraph will be reference for explanation of why the change occurred. All reliability changes will be covered under Volume III, Section I above. Any detail schedules on the Maintainability Plan not shown in Volume I will be shown in this section along with the progress made.

10.5.3 SECTION III - TRADE STUDY STATUS:

A tabular summary of all the formal trade studies ongoing in the following format:

TRADE STUDY STATUS

TRADE STUDY #	TITLE OR TRADE DESCRIPTION	DATE INITIATED	STATUS	REF. TO SECTION III
			- % Complete - in sign off - submitted - cancelled - on hold	

Trade studies that are reported or cancelled in this reporting period are deleted from the list in the following reports. All progress in the trade study is reported in Volume II under the appropriate component area.

10.5.4 SECTION IV - SURVIVABILITY/VULNERABILITY:

Summary of the survivability and vulnerability efforts expended during the reportin period to include Nuclear, Biological, Chemical (NBC) progress and vulnerability status of the engine system. Any detail schedules in the Survivability/Vulnerability Plan not shown in Volume I is reported in this section, along with the progress made against that schedule.

10.5.5 SECTION V - PRODUCIBILITY ENGINEERING PLANNING:

Summary of the PEP effort during the reporting period to include a wrap-up of the PEP efforts in each component area in Volume II. Any detail schedules in the PEP Plan not shown in Volume I are reported in this section, along with the progress made against that schedule.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:36Z
Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Continued)

10.5.6 SECTION VI - INTEGRATED LOGISTICS SUPPORT:

Summary of the Integrated Logistic Support (Logistic Support Analysis/Logistic Support Analysis Record) actions during the reporting period and their effect on the engine design and engine system.

10.5.7 SECTION VII - HUMAN FACTORS:

Summary of the effort expended in this reporting period in these areas. Volume II will provide the details. Any detail schedules in the Human Factors Plan not shown in Volume I are reported in this section, along with the progress made against that schedule.

10.5.8 SECTION VIII - MANPRINT:

Summary of the effort expended in this reporting period. Volume II will provide the details. Any detail schedules not shown in Volume I are to be shown in this section, along with the progress made against that schedule.

10.5.9 SECTION IX - ENGINE/AIRFRAME INTERFACE:

Summary of the effort expended in this reporting period on the Interface with each of the competing LHX airframe teams. This should include a summary of all the interface documents that have been exchanged between the engine contractor and the airframe contractors. Progress on the Air Vehicle Engine Integration Program (AVEIP) is to be reported.

10.5.10 SECTION X - PRODUCTION COMPETITION:

Summary of the effort expended in expanding the vendor base to include small, small disadvantaged, and woman owned business. See the Production Competition Plan for format. Details as to individual component/parts shall be covered in Volume II.

10.5.11 SECTION XI - CONFIGURATION MANAGEMENT:

Summary of the progress made during the reporting period on implementing the Configuration Management Plan. Topics shall include Configuration Control, Subcontractor/Supplier Control and metrication.

10.5.12 SECTION XII - QUALITY ENGINEER:

Summary of effort during the reporting period on Non Destructive Inspection and Non Destructive Testing programs, quality control of hardware and software, and critical parts management.
