DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

2. TITLE	1. IDENTIFICATION NUMBER
D028 Central Leveling System	DI-MISC-80487

3. DESCRIPTION/PURPOSE

3.1 The D028 system implements the concept of a data system to compute user levels for repair cycle items using a marginal analysis technique. It provides centrally computed stock levels to Government users for selected repair cycle items. It makes an optimum allocation of requirements in a manner that minimizes world-wide expected base backorders.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC REQUIRED	6b. GIDEP REQUIRED
871105	F/HQ AFSPACECOM-LKSP		

7. APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 The D028 system is applicable to contracts where the contractor is operating a base supply system.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
	AF Form 1530	F4267

10. PREPARATION INSTRUCTIONS

10.1 Format. The report shall be made by punch cards or AF Form 1530, "Punch Card Transcript."

10.2 Content.

10.2.1 XCB. Format for Daily Demand Rate (DDR)/Percent of Base Repair (PBR) Report Card. This transaction is produced to provide basic logistics data to the D028 system for each Air Force Logistics Command managed expendability, recoverability, repairability, category "XD2" and "XD3" stock number.

Card Columns	Data Element	Remarks
1-3	Document identifier	"XCB"
4-6	Routing Identifier (RI) (to)	Note 1
7	Blank	
8-22	National Stock Number (NSN)	
23-24	Unit of issue	
25-29	Blank	
30-35	Stock Record Account Number (SRAN)	
36-38	Routing identifier (from)	
39-41	Blank	
42-44	PBR	Note 2

(Continued on page 2)

11 DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:37Z
Check the source to verify that this is the current version before use.

10. Preparation Instructions (Continued)

45	Blank	
48-53	DDR	Note 3
54-56	Blank	
57-58	C factor	Note 4
59-73	Blank	
74-78	Report date (ordinal)	
79-80	Blank	

NOTE 1: Report to RI is determined from the RI on the item record.

NOTE 2: Assume decimal point between cols 42-43.

NOTE 3: The DDR is defined as the number of recurring demands divided by a period of time between 179 and 456 days. If the period of time is less, 180 days will be used. Assume decimal point between cols 49-50.

NOTE 4: Assume decimal point between cols 57-58.

10.2.2 XCC. Format for Level Receipt Acknowledgement.

(This card is produced in response to the "XCA.")

1-3	Document identifier	"XCC"
4-6	Routing identifier (RI) (to)	
7	Blank	
8-22	National Stock Number (NSN)	
23-24	Unit of issue	
25-29	AFLC computed level	
30-35	Reporting Stock Record Account Number (SRAN)	
36-38	Routing Identifier (RI) (from)	
39-40	Interchangeable and Substitute (I&S) subgroup code	
41	Parts preference code	
42	Reconciliation/update code	Note 1
43-57	Blank	
58	Compatible/incompatible code	Note 2
59-73	I&S master/bachelor NSN	
74-78	Report date (ordinal)	
79-80	Blank	

NOTE 1: This code will be taken from the input "XCA" card.

NOTE 2: When a D028 level is loaded to the NSN in cols 8-22 of the "XCA" card, or to a member of the I&S group, use code "C". When there is no requirement for the NSN or any member of the I&S group, use code "I."

10. Preparation Instructions (Continued)

10.2.3 7MS. Format for Intra-Air Force (AF) Reject Transactions

This card is produced whenever document identifier transactions "7LF," "9QK," "9Q1," 9QN," "XCB," and "XCC" do not pass the AF recoverable assembly management system (AFRAMS) edits.

1-3	Document identifier	"7MS"
4-6	Routing identifier (to)	
7-33	Other fields	Perpetuated from rejected transaction.
34-36	Document identifier	From rejected transaction (note 1).
37-78	Other Fields	Perpetuated from rejected transaction.
79-80	Reject/advice code	Note 2.

NOTE 1: If the document identifier in columns (col) 34-36 equals "XCB" (DDR/PBR) or "XCC" (level receipt acknowledgement) the type account code in col 7 will be taken from the second position of the reported SRAN. If the document identifier equals "XCC" and the reject advice code in cols 79-80 equals F1 (base/AFLC incompatibility), the centrally computed level recorded on the Air Logistics Center (ALC) record will be in cols 25-29. The level reported in the "XCC" transaction (cols 25-29) will be in cols 53-57.

NOTE 2: The following are common D028 reject/advice codes. A complete list is in Air Force Manual 67-1, Vol II, part two, chap 11, sec. C.

Code	Description
"AD"	Stock or part number unidentifiable.
"AQ"	Transaction/report date invalid or blank.
"BG"	Document identifier incompatible with ERRC code.
"D8"	Percent base repair invalid.
"D6"	Daily demand rate invalid.
"D9"	AFLC computed level invalid.
"F1"	Base/AFLC level incompatible.
"F2"	Compatible/incompatible code invalid.
"F3"	No ALC record of AFLC computed level.
