SUPERSEDING
Fed. Spec. DDD-C-441a
October 26, 1945

FEDERAL SPECIFICATION

CLOTHS, POLISHING

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This specification covers requirements for cotton polishing cloths.

1.2 Classification.

1.2.1 *Type and size.* Cloths covered by this specification shall be of one type and one size.

2. APPLICABLE SPECIFICATIONS AND STANDARDS

2.1 The following specifications and standards, of the issues in effect on date of invitation for bids, form a part of this specification to the extent specified herein.

Federal Specifications:

UU-P-268—Paper, Kraft, Untreated, Wrapping.
UU-T-111 — Tape, Paper, Gummed (Sealing and Securing).
CCC-T-191—Textile Test Methods.
PPP-B-636—Box, Fiberboard.
PPP-T-60—Tape; Pressure Sensitive Adhesive, Waterproof—for Packaging and Sealing.

Federal Standards:

Fed. Std. No. 102—Preservation, Packaging, and Packing Levels.
Fed. Std. No. 123—Marking for Domestic Shipment (Civilian Agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications, Standards, and Handbooks and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

(Single copies of this specification and other product specifications required by activities outside the Federal Government for bidding purposes are available without charge at the General Services Administration Regional Offices in Boston, New York, Washington, D. C., Atlanta, Chicago, Kansas City, Mo., Dallas, Denver, San Francisco, and Auburn, Wash.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications, Standards, and Handbooks from established distribution points in their agencies.)

Military Standards:

MIL-STD-105—Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129—Marking for Shipment and Storage.

(Copies of Military Specifications and Standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Material.

3.1.1 *Cloth.* The cloth shall be woven, made from cotton which has been cleaned,

Check the source to verify that this is the current version before use.

carded, drawn, and evenly spun into single yarns.

3.1.1.1 *Size.* The polishing cloths in any one sample size shall average not less than 17-1/2 by 21 inches. A tolerance of plus or minus 1 inch from these dimensions is permitted in the size of individual cloths.

3.1.1.2 *Edges.* All edges other than selvage edges shall be bound, hemmed, or overedged with cotton sewing thread.

3.1.1.3 *Yarns per inch.* The number of yarns per inch shall be not less than 45 in the warp and 42 in the filling when tested as specified in 4.2.4.

3.1.1.4 *Breaking strength.* The minimum breaking strength (grab method) shall be 25 pounds in the warp and 11 pounds in the filling when tested as specified in 4.2.4.

3.1.1.5 *Weight.* The weight shall be not less than 3.5 ounces per square yard when tested as specified in 4.2.4.

3.1.1.6 *Color.* Unless otherwise specified (see 6.2), the cloths may be furnished in any color or colors.

3.1.1.7 *Finish.* The cloths shall have a soft finish and shall be lightly napped on both sides.

3.2 Workmanship. The cloths shall conform to the quality and grade of product established by this specification and the occurrence of defects shall not exceed the applicable acceptable quality levels.

4. SAMPLING, INSPECTION, AND TEST PROCEDURES

4.1 Contractor's inspection responsibility. Unless otherwise specified the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own or any other inspection facilities and services acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.2 Sampling for inspection and acceptance. Sampling for inspection and acceptance shall be performed in accordance with the provisions set forth in MIL-STD-105, except where otherwise indicated hereinafter. For purposes of sampling, an inspection lot for acceptance inspection and tests shall consist of all polishing cloths of one color submitted for inspection and delivery at one time.

4.2.1 *Inspection of materials and components.* In accordance with 4.1, the supplier is responsible for insuring that materials and components used were manufactured, tested and inspected in accordance with the requirements of referenced subsidiary specifications and standards to the extent specified, or, if none, in accordance with this specification. In the event of conflict, this specification shall govern.

4.2.2 *Inspection of the end item.*

4.2.2.1 *Examination of the end item.* Examination of the end item shall be made in accordance with the classification of defects, inspection levels and acceptable quality levels (AQL's) set forth below. The lot size, for purpose of determining the sample size in accordance with MIL-STD-105, shall be expressed in units of polishing cloths for examinations in 4.2.2.1.1 and 4.2.2.1.2.

4.2.2.1.1 *Examination of the end item for defects in appearance, construction and workmanship.* The sample unit for this examination shall be one polishing cloth.

Examine	Defect
Appearance, construction and workmanship	Any hole, cut, or tear. Spot, stain, or streak affecting serviceability. Lumps or embedded foreign matter. Not cut, sewn, or finished as specified. Edges not bound, hemmed, or overedged, other than selvage edges. Not a soft finish and not lightly napped on both sides.

4.2.2.1.2 *Examination of the end item for defects in dimensions.* The sample unit for this examination shall be one polishing cloth.

Defects

Average size in any one sample size less than 367.5 square inches.

Any individual cloth varies by more than plus or minus one inch from the minimum specified 17-1/2- by 21-inch dimensions.

4.2.2.1.3 *Inspection levels and acceptable quality levels (AQL's) for examinations.* The inspection levels for determining the sample size, and the acceptable quality levels (AQL's) expressed in defects per 100 units shall be as follows:

Examination paragraph	Inspection level	AQL
4.2.2.1.1	L-7	2.5
4.2.2.1.2:		
Average unit	L-4	—
Individual unit	L-4	2.5

4.2.3 *Examination of preparation for delivery requirements.* An examination shall be made to determine that packaging, packing, and marking requirements of section 5 of this specification are complied with. Defects shall be scored in accordance with the list below. The sample unit shall be one shipping container fully prepared for delivery with the exception that it need not be sealed. Defects of closure listed below shall be examined on shipping containers fully prepared for delivery. The lot size shall be the number of shipping containers in the end item inspection lot. The inspection level shall be L-4 and the AQL shall be 4.0 defects per 100 units in accordance with MIL-STD-105.

Examine	Defect
Marking (exterior and interior)	Omitted, incorrect, illegible, of improper size, location, sequence, or method of application.
Materials	Any component missing or damaged.
Workmanship	Inadequate application of components, such as incomplete closure of container flaps, improper taping, loose strapping, inadequate stapling. Bulging or distortion of containers.
Content	Number of bundles per container is more or less than required. Number per bundle is more or less than required.[1]

[1] For this defect, five bundles shall be examined from each shipping container in the sample.

4.2.4 *Testing of the end item.* Testing of the end item shall be made for the applicable characteristics as indicated in table I for each lot presented for inspection. The lot size shall be expressed in units of polishing cloths. The sample unit shall be two polishing cloths. Five sample units randomly taken from throughout the lot shall be tested. The lot shall be unacceptable if one or more sample units fail to meet any test requirement specified.

5. PREPARATION FOR DELIVERY

(Fed. Std. No. 102 shall be referred to for definitions and application of the various levels of packaging and packing protection for civil agency procurements.)

5.1 **Packaging.** Packaging shall be level A or C, as specified (see 6.2).

5.1.1 *Level A.* Twelve polishing cloths, of one color only, shall be neatly stacked and then completely wrapped in 30-pound-minimum basis weight kraft paper conforming to grade B of UU-P-268. The package shall be secured with 2-inch-minimum width gummed paper tape conforming to class 1 of UU-T-111.

TABLE I.—*Physical requirements*

Characteristic	Requirement reference	Test method[1]	Number of determinations per individual sample unit[2]	Results reported as
Fiber identification	3.1	1200	1	Pass or fail
Yarns per inch	3.1.1.3	5050	3	Average of 3 determinations to nearest whole number
Breaking strength	3.1.1.4	5100	3	Average of 3 determinations to nearest whole number
Weight	3.1.1.5	5041	3	Average of 3 determinations to nearest 0.1 ounce

[1] Test methods shall be performed in accordance with CCC-T-191, except that the stipulation as to the number of specimens to test, number of determinations to perform, or number of results to report, shall not apply.

[2] Test report shall include all values on which average results are based.

5.1.2 *Level C.* Polishing cloths shall be packaged in accordance with the commercial practice.

5.2 **Packing.** Packing shall be level A, B, or C, as specified (see 6.2).

5.2.1 *Level A.* Six hundred polishing cloths of one color only, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to class 2, V3c or V3s, style RSC of PPP-B-636. All seams, corners, and manufacturer's joints of the container shall be sealed by the application of a 3-inch-minimum width olive drab color cloth tape conforming to type III, class 1 of PPP-T-60. Each shipping container shall be closed and reinforced with flat steel strapping or tape banding in accordance with the Appendix of the container specification.

5.2.2 *Level B.* Six hundred polishing cloths of one color only, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to type I or II, class 1, style RSC of PPP-B-636. The minimum bursting strength of the fiberboard shall be 275 p.s.i. All flaps of the fiberboard shipping containers shall be securely sealed with an adhesive commercially used for the specific product being packed by application throughout the entire area of contact between the flaps, or by a combination of metal stitching the bottom flaps and sealing the top flaps with adhesive.

5.2.3 *Level C.* Polishing cloths, packaged as specified in 5.1, shall be packed in a manner to insure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. Containers shall be in accordance with rules or regulations of carriers applicable to the mode of transportation.

5.3 **Marking.**

5.3.1 *Civil agencies.* In addition to any special marking required by the contract or order (see 6.2), interior packages and shipping containers shall be marked in accordance with Fed. Std. No. 123.

5.3.2 *Military requirements.* In addition to any special marking required by the con-

tract or order (see 6.2), interior packages and shipping containers shall be marked in accordance with MIL-STD-129.

6. NOTES

6.1 Intended use. The cloths covered by this specification are intended to be used for polishing.

6.2 Ordering data. Purchasers should exercise any desired options offered herein and procurement documents should specify the following:

(*a*) Title, number, and date of this specification.
(*b*) Color required (3.2).
(*c*) Selection of applicable levels of packaging and packing (5.1 and 5.2).

6.3 For civil agencies. Level A packaging and Level B packing shall be used by ordering agencies only when shipment is known to be made to a holding supply depot or warehouse from which partial shipment will be made to ultimate consumers.

6.4 Transportation description. The transportation descriptions and minimum weights applicable to this commodity are:

Rail:
Dry goods, not otherwise indexed by name.
Carload minimum weight 20,000 pounds, subject to Rule 34, Uniform Freight Classification.

Motor:
Dry goods, not otherwise indexed.
Truckload minimum weight — any quantity.

Notice. When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.
