MIL-F-63090A(AR)
AMENDMENT 2
16 December 1982
SUPERSEDING
AMENDMENT 1
24 March 1982

MILITARY SPECIFICATION

FIRING DEVICE, MULTI-PURPOSE, M142
PARTS, ASSEMBLY, AND PACKING

This amendment forms a part of Military Specification MIL-F-63090A(AR), dated 21 April 1981, and is approved for use by the US Army Armament Research and Development Command and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 2

2.1: DRAWINGS - Add the following to the list of drawings:

"9349653 - Test Cap, Blasting, Non-Electric, for M142 Firing Device."

* 3.3.2, Lines 3 and 4: Change to read:

"the tension release attachment is released upon cutting the trip wire or flipping it off a pin when tested as specified in 4.5.1.2."

PAGE 3

* 3.3.4: Delete this paragraph and substitute a new paragraph to read:

"3.3.4 Pressure release. The firing device shall function at two (2) pounds or less when a load of four (4) pounds is applied to the sear platform and then gradually reduced when tested as specified in 4.5.1.4."

PAGE 22

* 4.4.2.16, Major 101: Delete and substitute a new Major 101 to read:

"101 Any warning statement, phrase or word not printed in proper color"

4.5.1.1: Second sentence: Delete "Screw ... switch." and substitute a new sentence to read:

"Screw coupling base with attached M7 Non-Electric Blasting cap or alternative test cap (Dwg. 9349653) into the switch."

* 4.5.1.2: Delete this paragraph and substitute a new paragraph to read:

"4.5.1.2 Tension release. Secure switch to a fixed object with nails, screws or wire. Screw coupling base with attached M7 Non-Electric Blasting cap or alternative test cap (Dwg. 9349653) into the switch. Fit tension release attachment and loop end of trip wire over the curved neck. Apply the specified tension to the trip wire and observe for compliance with 3.3.2.1. Remove the pin with the round loop. Then carefully remove the safety pin (cotter pin) from a safe distance by means of a length of wire or cord. The trip wire shall then be released by cutting or flipping off a pin while maintaining the specified tension. Observation shall be made for compliance with the applicable requirement."

4.5.1.3: (See change to 4.5.1.1).

* 4.5.1.4: Delete this paragraph and substitute a new paragraph to read:

"4.5.1.4 Pressure release. secure switch to a fixed object with nails, screws or wire. Screw coupling base with attached M7 Non-Electric Blasting cap or alternative test cap (Dwg. 9349653) into the switch. A preload of four (4) pounds shall be applied to the sear plate platform. Remove the pin with the round loop. Then carefully remove the safety pin (cotter pin) from a safe distance by means of a length of wire or cord. Gradually reduce the load on the sear plate platform while observing the gage to determine compliance with the applicable requirement."

4.5.2: (See change to 4.5.1.1).

PAGE 38

4.5.3, First sentence: Delete "Condition ... hours." and substitute a new sentence to read:

"Condition firing devices, with coupling base with attached M7 Non-Electric Blasting cap or alternative test cap (Dwg. 9349653) screwed in, at minus 50° for not less than sixteen (16) hours."

5.4: After "Unitization" add "(Palletization)."

5.4.1, Line 2: Delete "19-48-4116/8S-20PA1002" and substitute "19-48-4116-20PA1002 Appendix 128F."

The margins of this amendment are marked with an asterisk or vertical lines to indicate where changes (additions, modifications, corrections, deletions) from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
