COMMERCIAL ITEM DESCRIPTION

BRUSH, ROOF, KNOTTED STYLE, THREE KNOTS

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification H-B-471.

This commercial item description covers roofing brushes designed for the application of tars and asphalts to roofs. The block shall be made of smoothly finished, close-grained hardwood, or foamed, structural polypropylene.

Salient characteristics:

The filament in each knot shall consist of white or gray tampico fiber, and shall extend no less than 3 inches from the ferrule. Each knot shall be no less than 1-3/8 inches in diameter at the ferrule. The blocks shall be at least 6 inches long, 1-3/4 inches thick, 2-1/4 inches wide, and shall be provided with a threaded hole with a 3/4-inch 5-pitch acme thread for attaching an extension pole.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.
