COMMERCIAL ITEM DESCRIPTION
EASEL, DISPLAY AND TRAINING

The General Services Administration has authorized the use of this commercial item description by all federal agencies.

1. Scope: This Commercial Item Description covers folding easels which can function as a chalkboard, dry erase marker board, display board, or for visual presentations. The easel shall be of the following types, as specified.

2. Classification:

Type:	I. Green Chalkboard Easel (Old)
	II. White Melamineboard, Dry-Erase Marker Easel (Old)
	III. Green Chalkboard Easel (New)
	IV. White Melamineboard, Dry-Erase Marker Easel (New)

3. Salient Characteristics:

3.1 Type I. & II. The easels shall contain a panel having a front working surface of either green chalkboard or dry erase melamine board. The easels shall have two posts to provide a means for holding paper, legs which fold or telescope compactly for storage, bracing leg(s) which, when opened, shall swing or pivot out to maintain the easel in an upright position, and shall be held in place by a spring-type release pin and slot, or comparable type positive locking mechanism. The pin or locking mechanism (including bolts/wing nuts, clips, etc.) shall provide reliable protection against accidental collapse during use or relocation within a work area. A handle for carrying the folded easel shall be securely attached at a suitable location.

3.2 Type III. & IV. The easels shall contain a panel having a front writing surface of either green chalkboard or dry erase melamine board as specified in the order data. The easels shall have two posts to provide a means for holding paper, a convenient front mounted marker and eraser tray. The easels shall be capable of adjusting its board height from table top to the full upright position (including a horizontal position) to serve as a Sand Table for Military Field briefings.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to General Services Administration, Federal Supply Service, Engineering Division, 26 Federal Plaza, New York, NY 10278.

3.3 Dimensions.

3.3.1 The dimensions of the working surface of the panel for types I. & II. boards shall not be less than 69.8 cm (27 .48 inches) wide by 91.4 cm (35.98 inches) high. The easels shall stand not less than 177 cm (69.7 inches) high when unfolded and in the upright position. When folded the dimensions shall be a maximum of 7.7 cm (3 inches) deep, 74 cm (29 1/8 inches) wide, and 101.9 cm (40 1/8 inches) high.

3.3.2 The dimensions of the working surface of the panel for types III. & IV. boards shall not be less than 69.8 cm (27 .48 inches) wide by 88.9 cm (35 inches) high. The easels shall stand not less than 172 cm (67.72 inches) high when unfolded and in the upright position. When folded the dimensions shall be a maximum of 11.45 cm (4.53 inches) deep, 86.4 cm (34.02 inches) wide, and 116.9 cm (46.03 inches) high.

3.4 Storage Container.

3.4 1 Type I. & II. storage containers shall be able to hold a 12.7 cm x 5.1 cm x 3.2 cm (5 inches x 2 inches x 1-1/4 inch) and shall contain a felt eraser along with at least six crayons, or felt tip markers, or pieces of chalk, or a combination of all three shall be either permanently attached to the back of the panel or included as an integral part of the chalk trough or shelf.

3.4.2 Type III. & IV. storage containers shall be provided which are suitable for storage of 12.7 cm x 5.1 cm x 3.2 cm (5 x 2 x 1 1/4 inch) felt erasers along with marking devices. The storage container shall be either attached to the back of the panel or as an integral part of the tray. The bottom of each leg shall be designed with no mar feet to protect floors and prevent the easel from moving when in use.

3.5 Leg Assembly.

3.5.1 Type I. & II. easels shall be of either three-leg or four-leg construction at the manufacturer's option, provided that necessary support is assured for maximum stability.

3.5.2 Type III. & IV. leg assembly shall swing out to maintain the easel in upright position and shall be held in place by large side locking knobs on both sides. The large side knobs shall lock leg assembly either in open position or into a compact stow position for ease of transporting.

3.6 Chalk Trough or Shelf.

3.6.1 Type I. & II. easels shall contain a front mounted trough or shelf for holding writing instruments. The trough or shelf shall be not less than 45.7 cm (17.99 inches) long, 6.43 cm (2-1/2 inches) wide, 2.5 cm (.98 inch) deep, and shall be made from material of sufficient thickness to firmly support the chalk, eraser, crayons, and when applicable, paperboard or other matter. The trough or shelf shall be so constructed that it will correctly align and securely fasten at each of the levels.

3.6.2 Type III. & IV. easels shall contain a front mounted trough or shelf for holding writing instruments. The trough or shelf shall be made from material of sufficient thickness to firmly support the chalk, eraser, and markers. The trough or shelf shall be constructed that it will be permanently attached to the easel. The chalk trough or shelf may have an integral drawer or attachment for storage of a felt eraser along with marking devices.

3.7 Operating Instructions. Operating instructions for all types shall be prominently displayed and securely attached to the back of the panel.

3.8 Identification Marking. Each easel shall be marked with the manufacturer's name or trademark.

3.9 Workmanship. Rivets, if used, shall be set in accordance with normal commercial practice, including but not limited to exhibiting a well formed, firm, flush seating. All other fasteners shall be firmly tightened. The easel shall be rigid, stable and sturdy during its normal service. All the parts shall be properly aligned. The easel shall not fluctuate or vibrate in any way when pressure from the writing hand is applied to its writing surface. All the materials used, shall be of good commercial quality. The easel shall be free from burrs, rough or sharp edges, scratches, discoloration or other defects or imperfections which will impair serviceability and adversely affect appearance or which might constitute a personal hazard to the user. The easels shall be set up in accordance with manufacturer's instructions.

4. **Regulatory Requirements:** The offerer/contractor is encouraged to use recovered materials to the maximum extent practical, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. **Quality Assurance Requirements:**

5.1 Product Conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards and quality assurance practices and be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

5.2 Examination and Testing.

5.2.1 Suppliers are encouraged to use quality control (QC) techniques that exhibit control over their processes (e.g. (Statistical Process Control) SPC techniques) as defined in American National Standards Institute (ANSI) Z1.1, Z1.2 and Z1.3/ American Society for Quality Control (ASQC) B.1, B.2 and B.3 that systematically reduce excess variations. If used, objective evidence shall be available that demonstrates overall measurement adequacy techniques and controls. These techniques shall ensure quality levels equal to, or greater than, those cited in applicable technical document or, herein.

Check the source to verify that this is the current version before use.

5.2.2 End item inspection/testing may be used by the offeror or the Government representative, as a means to determine the effectiveness of the in process quality controls. While in-process controls shall not be substituted for end item performance testing, they may be used when sampling for visual and dimensional conformance.

5.2.3 For those characteristics for which there are no such controls, or for end item performance test, lot by lot sampling for inspection/test shall be required. The sample unit shall be one easel. Sampling shall be in accordance with the American National Standards Institute (ANSI) / American Society for Quality Control (ASQC) Z1.4, Sampling Procedures and Tables for Inspection by Attributes.

5.2.4 An inspection lot shall consist of all like items submitted for inspection at one time. The inspection level for visual and dimensional sampling shall be S-3 with an AQL of 4.0 percent defective. The supplier must provide objective evidence (tests and inspection records) that the presented material meets the requirements of the sampling plan as indicated above.

6. Packaging:

6.1 Preservation, packing and marking shall be as specified in the contract or order.

7. Notes:

7.1 Source of Documents. Issues of the following documents, in effect on the date of invitation for bids or request for proposal form a part of this document to the extent specified herein.

7.1.1 Federal Acquisition Regulation (FAR) may be obtained from the Superintendent of Documents, Government Printing Office, Washington. DC 20402.

7.1.2 ANSI / ASQC Z1.4 may be obtained from the American Society for Quality Control, PO Box 3005, 611 E. Wisconsin Avenue, Milwaukee, WI 53201-4606.
