COMMERCIAL ITEM DESCRIPTION

PLUG SET, RADIATOR TEST

The General Services Administration has authorized the use of this Commercial Item Description (CID) as a replacement for Military Specification MIL-P-45570B(AL).

1. ABSTRACT.

This description covers one adjustable compression-type motor vehicle radiator test plug set for plugging the radiator hose inlet(s) and outlet(s) during tests and repairs.

2. SALIENT CHARACTERISTICS.

The test plug set shall have the capability of sealing various sizes of inlet and outlet automobile radiator ports. The test plug itself shall be capable of fitting inside and blocking the internal diameters (ID) of the port passages. The test plug set shall consist of the following quantities and sizes of plugs:

2 plugs able to fit inside and block a port having an ID of 0.87 inch
2 plugs able to fit inside and block a port having an ID of 1.00 inch
2 plugs able to fit inside and block a port having an ID of 1.12 inch
4 plugs able to fit inside and block a port having an ID of 1.50 inch
2 plugs able to fit inside and block a port having an ID of 1.75 inch
2 plugs able to fit inside and block a port having an ID of 2.00 inch
2 plugs able to fit inside and block a port having an ID of 2.50 inch

The sealing element portion of each plug shall be capable of recovering from stress periods of compression as experienced during radiator testing, without visual evidence of compression set or aging. All metal parts of the plug set shall be made of brass, stainless steel, bronze or copper. Each radiator plug, when installed for testing, shall be capable of holding 20 pound-force per square inch gage (psig) within the radiator being tested for a period of one (1) minute without leakage.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within specified tolerances using conversion tables contained in the latest revision of FED-STD-376, and all other requirements of this commercial item description are met.

Beneficial comments, recommendations, clarifications, additions, deletions, etc. and any data which may improve this document should be sent: Commander, U.S. Army Armament Research, Development and Engineering Center, ATTN: SMCAR-EST-S, Rock Island, IL 61299-7300

Check the source to verify that this is the current version before use.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

3. QUALITY ASSURANCE PROVISIONS

Market Acceptability Criteria. The commercial item test plug set shall have the capability of sealing various sizes of inlet and outlet automobile radiator ports. The test plug set shall be capable of fitting inside and blocking the internal diameters of 0.87 inch, 1.00 inch, 1.12 inch, 1.50 inch 1.75 inch, 2.00 inch, and 2.50 inch radiator ports. The sealing element portion of each plug shall be capable of recovering from stress periods of compression as experienced during radiator testing, without visual evidence of compression set or aging. Each radiator plug, when installed for testing, shall be capable of holding 20 pound-force per square inch gage (psig) within the radiator being tested for a period of one (1) minute without leakage.

Contractor certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this commercial item description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4. REGULATORY REQUIREMENTS.

The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practical.

5. PACKAGING

Preservation, packing, packaging, labeling, and marking. The preservation, packing, packaging, labeling, and marking shall be as specified in the contract or order.

6. NOTES.

Ordering data. Acquisition documents should specify the following :

Plug Set, Radiator Test, A-A-50302, and date of this document.

As the result of a market acceptability survey the following companies have shown to be manufacturers of an acceptable product described within this commercial item description. This list does not limit or exclude the

No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.
