MILITARY SPECIFICATION SHEET

MARKING MATERIALS AND MARKERS, ADHESIVE, ELASTOMERIC, PIGMENTED: LETTERS AND NUMERALS

The complete requirements for procuring letter and numeral markers described herein shall consist of this document and the issue in effect of MIL-M-43719.

This specification is approved for use by all Departments and Agencies of the Department of Defense.

REQUIREMENTS

* Materials.- Letters and numerals shall be made from marking material, liner, and when specified in the contract or order (see 6.2 of the general specification), translucent transfer sheet, all conforming to requirements specified in MIL-M-43719.

Construction.- Letters and numerals shall be unmounted or mounted, as specified in the contract or order. (Note: In the trade, "unmounted" is also known as "cutout", and "mounted" as "pre-spaced" and "individually pre-spaced".)

Unmounted.- Unmounted letters and numerals shall be cut to shape and shall be made from a layer of elastomeric marking material with a protecting liner on the adhesive side. All edges shall be cut smooth. Unless otherwise specified in the contract or order, the letters and numerals shall be in heights, dimensions, and configurations of Series C Alphabet, 1966 Edition, Standard Alphabets for Highway Signs, Bureau of Public Roads, U.S. Dept. of Commerce. Letters and numerals in other heights shall be identical to Alphabet C in configuration, and the dimensions shall be scaled in direct proportion. When specified in the contract or order, letters and numerals shall be covered on their face side with translucent transfer sheet, die-cut flush with the edges of the letters and numerals.

* Mounted.- Unless otherwise specified in the contract or order (see Ordering data), mounted letters and numerals shall consist of letters and numerals cut from elastomeric marking material in the heights, dimensions and configurations of Series C Standard Alphabet, Bureau of Public Roads, with each letter mounted on a rectangular liner and covered on its face side with a matching rectangular, translucent transfer sheet. All edges shall be cut smooth. The liner shall not be cut completely through at the outline of letters and numerals, nor shall it be cut so deep as to interfere with its ready removal from the marker or to result in distortion of the marker when removal is attempted. Notches, punch holes, slits, or other cuts in the rectangles will be permissible, provided the quantity and type are limited so that the resulting mounts are compatible in use with solid rectangular mounts. This allows no protuberances beyond the specified rectangular dimensions. For Series C Standard Alphabet, the rectangles shall be in the size shown in table I. The letter and number characters shall be centrally located in the rectangles.

TABLE I.- Dimensions of rectangular liners and transfer sheets for letters and numerals

Height (in.) of letter or numeral	1	1-1/2	2	3	4
Height (in.) of liner and transfer sheet	1-1/4	1-3/4	2-1/4	3-1/2	4-1/2
Width (in.) of liner and transfer sheet					
a. Letters J, L, and T	5/8	15/16	1-1/4	1-7/8	2-1/2
b. Letters M and W	57/64	1-21/64	1-25/32	2-21/32	3-17/32
c. Letter I and and numeral	1-3/8	9/16	3/4	1-1/8	1-1/2
d. All other letters and numerals	45/64	1-1/32	1-13/32	2-3/32	2-25/32

* Kits.- Letters and numerals of one size may be furnished in kit form. Unless otherwise specified in the contract or order, each kit shall contain the following quantities:

20 each: Letters E, I, S, T, A, L, N, O, R
10 each: Letters B, C, D, F, G, H, J, K, M, P, Q, U, V, W, X, Y, Z
20 each: Numerals 0 to 9 inclusive

NOTES

Other standard alphabets are as follows:

(a) Alphabets B, D, E and F of "Standard Alphabets for Highway Signs (U. S. Dept of Commerce, Bureau of Public Roads)".
(b) Block lettering as in MIL-M-11745.
(c) Styles as given in MIL-STD-642 and MIL-STD-1223.

* Ordering data.- Procurement documents should specify the following in addition to the ordering data listed in the general specification:

(a) Whether letter, numeral, or letter and numeral kit is to be procured.
(b) Quantity of letters or numerals required if other than specified.
(c) If letter or numeral, which letter or numeral.
(d) Size of letters and numerals (height).
(e) Whether mounted or unmounted (see construction).
(f) Dimensions and configurations of letters and numerals, and dimensions of rectangles of mounted characters, if other than Series C Alphabet.
(g) If unmounted, whether translucent transfer sheet is required (see construction).

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use submitting comments and suggestions for improvements. All users of military standardization documents are invited to provi suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, an mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, w too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
