COMMERCIAL ITEM DESCRIPTION

SALT SUBSTITUTE (INDIVIDUAL PACKET)

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description as a replacement for U.S. Department of Veterans Affairs Specification X-1640/29.

This Commercial Item Description (CID) covers salt substitute, packed in commercially acceptable individual packets, suitable for use by the Federal Government.

Salient characteristics.

The salt substitute shall have typical color, flavor, be dietetically free from sodium with a low sensitivity to moisture, and must sprinkle and season like salt to satisfy the need for salty flavor in foods. The salt substitute shall have a minimum shelflife of 12 months. The active ingredient in the salt substitute shall be potassium chloride of Food Chemicals Codex or U.S. Pharmacopoeia-National Formulary quality. Bulking agents such as monopotassium glutamate or glutamic acid hydrochloride are acceptable. The sodium content of the salt substitute (including fillers) shall not exceed 0.01 percent. Individual packets shall weigh 0.5 gram to 1.0 gram. The sodium content shall be determined to the nearest 0.001 percent.

If purchasers wish other than the individual, single-use paper shaker packet composed of a single-faced corrugated member having four flutes and sealed at both ends, with a closed-cut dispensing opening running transversely across the four flutes, they must specify so in the solicitation, contract, or purchase order.

FSC 8940

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Analytical requirements.

Chemical analyses shall be made in accordance with the following method in the Official Methods of Analysis of the Association of Official Analytical Chemists:

Test	Chapter and Section	Paragraph Number
Sodium	Chapter: Wines Section: General	963.13

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When the solicitation, contract, or purchase order requires that product quality or acceptability or both be determined, the Processed Products Branch (PPB), Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, shall be the certifying activity and shall make the determination in accordance with applicable PPB procedures. The product shall be examined or analyzed or both in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers.

Preservation, packaging, packing, labeling, and marking.

The salt substitute shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.
