Check the source to verify that this is the current version before use.

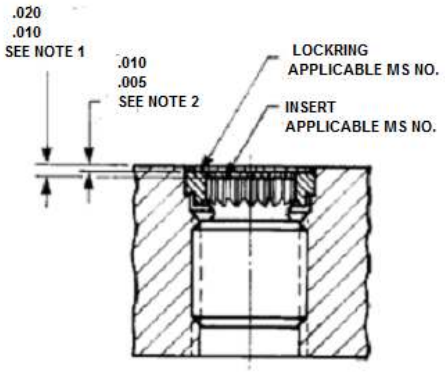

FIGURE 3. MS51993 Insert with SAE-AS51997 Lock Ring.

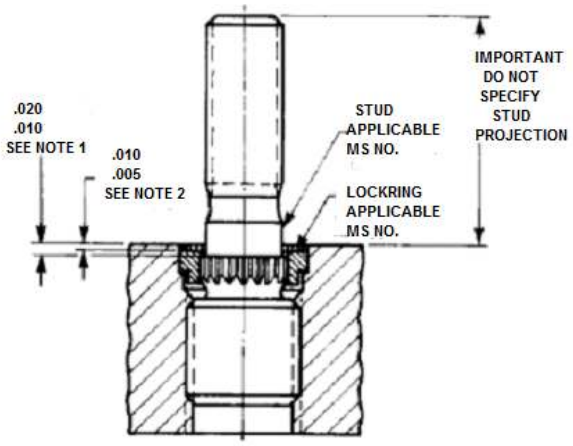

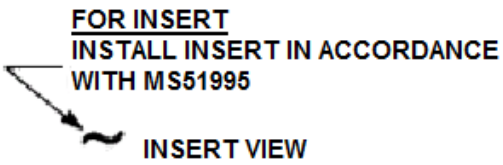

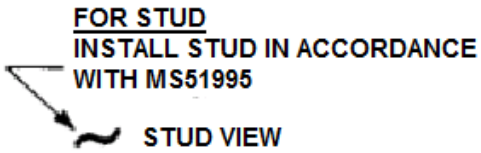

FIGURE 4. SAE-AS51992 and MS51497 Oversize Stud with SAE-AS51997 Lock Ring.

Hole preparation in accordance with MS51996 per applicable external thread of insert or stud end thread of stud and corresponding dash number.

NOTES:

1. Install insert or stud to depth shown in Figures 1 thru 4.
2. Drive lock ring to depth shown in Figures 1 thru 4.
3. Typical drawing callout to be located in vicinity of part identification.

4. Replacement of inserts, studs and lock rings is made with same size parts as those removed. Use above installation procedure except before driving new lock ring, rotate the lock ring external serrations to a position aligned with those in parent material. If parent material is damaged, use oversize inserts or oversize studs specified above.
5. Dimensions are in inches.
6. In the event of a conflict between the text of this standard and the references cited herein, the text of this standard takes precedence.
7. Changes from previous issue. Marginal notations are not used in this revision to identify changes with respect to the previous issue due to the extent of the changes.
