INTERIM COMMERCIAL ITEM DESCRIPTION

DEXTROSE INJECTION, USP, PARTIAL-FILL BAGS WITH VIAL ADDITIVE PORT

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-RST, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

Salient characteristics:

Shall be Dextrose Injection, USP, 5%.

All ingredients shall be of pharmaceutical grade.

The solution shall be supplied in an oversized single dose, sterile, transparent, flexible plastic bag having one permanently attached outlet port for administration and one permanently attached inlet port for interlocking a complementary glass small volume parenternal drug vial.

The outlet port shall be force-fitted with a sterility protector with a tab for ease of removal and shall accept and retain the piercing device of the stocklisted administration sets. The outlet port shall be of such design as to hold and make a leak-proof fit with the IV administration set. The inlet port shall have a hermetically sealed sterility protector with a ring for ease of use. The inlet port shall be of such design as to facilitate addition of active drugs to the diluent container, and shall accept and make a proper tamper-resistant leak-proof fit, with the complementary glass small volume parenternal drug vials. The combined unit shall be of such design as to prevent the mixing of the two components until just prior to administration.

AMSC/NA FSC 6505

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The following Intravenous Injection Sets shall be compatible with the subject item:

6515-00-115-0032	6515-00-140-0888
6515-00-185-5158	6515-00-484-0484
6515-01-082-1021	6515-01-105-0614
6515-01-153-4703	6515-01-153-5669

Type I shall be supplied 50 ml in a bag with a capacity of not less than 150 ml.

Type II shall be supplied 100 ml in a bag with a capacity of not less than 150 ml.

Type III shall be supplied 250 ml in a bag with a capacity of not less than 300 ml.

Workmanship. The Injection shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG).

For Size 1, one package containing 24 bags, as specified, constitutes one unit.

For Size 2, four plastic bags shall be supplied in a tray which shall serve as a water vapor barrier. One package containing 12 overpouches (48) bags, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements

of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Numbers are covered by this document:

NSN	ITEM IDENTIFICATION	TYPE	SIZE
6505-01-260-1237	DEXTROSE INJECTION, USP, 5%, 50 ml, 48s	I	2
6505-01-260-1238	DEXTROSE INJECTION, USP, 5%, 100 ml, 48s	II	2
6505-01-260-1239	DEXTROSE INJECTION, USP, 5%, 250 ml, 24s	III	1

Ordering data. Expiration dating required, intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge (DO NOT STAPLE), and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
