COMMERCIAL ITEM DESCRIPTION

BLISTER SHEET, UNIT DOSE

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers a blister sheet suitable for use with a solid and liquid dose packaging system.

Salient characteristics:

The unit dose blister sheet shall provide for a vapor and moisture barrier to protect its contents, either solid or liquid. The blister sheets shall be differentiated into solid or liquid and shall be of the following types:

Type 1	18-dose, solid
Type 2	40-dose, solid
Type 3	5 ml., liquid, 10 doses
Type 4	15 ml., liquid, 10 doses
Type 5	30 ml., liquid, 10 doses

The blister sheet shall be 4 inches (10.2 cm) wide by 9 inches (22.9 cm) long. It shall be fabricated of a commercial grade polypropylene suitable for solid and liquid containment. The sheet shall contain a blister package for each dose as specified above for the type.

The blister sheet shall be amber in color to inhibit ultraviolet penetration and protect light sensitive drugs. The sheets shall be transparent to allow visualization of contents.

The individual packages shall be easily separated from the sheets. The packages shall open easily.

The blisters for liquid doses shall have graduated markings to aid in the filling process.

AMSC N/A FSC 6530

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Workmanship. The unit dose blister sheet shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package containing 144 type 1 sheets or 216 type 2 sheets or 100 sheets of one type only of type 3, 4, or 5, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 1.0 (percent defective) and an inspection level of II. The unit of product for examination purposes shall be one unit dose blister sheet as specified in this description.

Defects.

Blister sheet not free of cracks, tears, or ruptures.

Blister sheet not amber in color.

Blister sheet not transparent.

Liquid dose blister does not have graduations.

Individual blister does not separate easily from sheet.

Sampling for tests. Sampling for tests including dimensional test, shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and inspection level of S-3. The unit of product for test purposes shall be one unit dose blister sheet.

Tests.

Sealing test

Two liquid dose and two solid dose blister sheets shall be sealed to an appropriate lidding sheet using a suitable power sealer. The blister sheet shall then be checked for a positive seal, easy peeling of the lidding sheet, and non-resealability after peeling off of the lidding sheet. Failure for the blister sheet to achieve a positive seal, have an easily peeled lidding sheet, and be non-resealable after peeling of the lidding sheet, shall constitute a defect.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Numbers are covered by this document:

6530-01-139-9580 (Type 1)
6530-01-139-9581 (Type 2)
6530-01-166-8998 (Type 3)
6530-01-166-8997 (Type 4)
6530-01-139-9578 (Type 5)

NOTES:

The above types of unit dose blister sheets shall be compatible with the following unit dose lidding sheets:

Blister Sheet	Lidding sheet
Type 1	NSN 6530-01-166-7770
Type 2	NSN 6530-01-166-0153
Type 3, 4, & 5	NSN 6530-01-170-0643

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
