COMMERCIAL ITEM DESCRIPTION

BOTTLE AND TUMBLER SET

The General Services Administration has authorized the use of this Commercial Item Description as a replacement for Federal Specification L-B-550B which is canceled.

This Commercial Item Description covers a disposable bottle and tumbler set suitable for hospital patient use.

Salient characteristics:

The bottle and tumbler set shall consist of a bottle with a minimum capacity of 32 ounces and a tumbler with a minimum capacity of 5-1/2 ounces. The set shall be disposable. The color shall be blue.

The bottle and tumbler shall each be of one piece construction conforming to the shape and dimensions of Figure 1. The tumbler shall have a smooth, rounded drinking edge and shall fit the bottle snugly.

Molding compound used for manufacturing the bottle and tumbler set shall be virgin high density polyethylene or polypropylene suitable for conventional molding techniques. However, any excess plastic arising from normal blow molding may be reground and blended with virgin material but shall not exceed 30 percent of the blend.

The bottle and tumbler shall both sit evenly on a flat surface without rock or wobble.

The bottle and tumbler shall both be free from objectionable odor, cracks, holes, or thin areas. The edges shall be smooth or rounded to preclude injury to patients.

The set components shall be free of grease, oil, dirt, chips, or other foreign materials.

AMSC N/A FSC 7360

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Workmanship. The bottle and tumbler set shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Set (SE). One set (one-quart carafe and a six ounce tumbler), as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 1.0 (percent defective) and an inspection level of II. The unit of product for examination purposes shall be one bottle and tumbler set as specified in this description.

Defects.

Bottle or tumbler does not meet minimum capacity requirements.

Bottle or tumbler not one piece construction.

Tumbler does not fit the bottle snugly.

Tumbler does not have smooth, rounded drinking edge.

Set not made of high density polyethylene or polypropylene.

Set components not free of grease, oil, dirt, chips, or other foreign materials.

Set components not free of cracks or holes.

Bottle or tumbler does not sit on flat surface without rock or wobble.

Bottle or tumbler not free from objectional odor or thin areas.

Sampling for tests. Sampling for tests (dimensional) shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and inspection level of S-1. The unit of product for test purposes shall be one bottle and tumbler set.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Number is covered by this document:

7360-00-935-2837

Ordering data. Intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
