Fed. Std. No. 222
CANCELLATION
January 19, 1971

FEDERAL STANDARD

RADIATION STANDARD FOR COMMUNICATION AND OTHER INFORMATION - PROCESSING EQUIPMENT

This cancellation was approved by the Commissioner, Federal Supply Service, General Services Administration, Washington, DC 20406.

Federal Standard Number 222, dated November 20, 1963, and Notice-1, dated October 28, 1964, have been superseded by two publications, noted below issued in the United States Communications Security Board (USCSB) National COMSEC/EMSEC Issuance System:

"(1) NACSEM 5100, Compromising Emanations Laboratory Test Standard, Electromagnetics, dated October 1970, and (2) NACSEM 5103, Compromising Emanations Laboratory Test Standard, Accoustics, dated October 1970. These are classified documents, available only to appropriately cleared individuals with a valid 'need-to-know'. Government Organizations requiring these documents should address their requests to the Commanding Officer, Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, Pennsylvania 19120. Commercial firms should address their inquiries concerning these documents to their contracting Government Organizations."
