TIER I ADOPTION NOTICE

ISO/IEC/IEEE 24748-8:2019, "Systems and software engineering – Life cycle management – Part 8: Technical reviews and audits on defense programs", was adopted on June 1, 2025, for use by the Department of Defense (DoD). The technical content of this international standard is identical to IEEE 15288.2.

Background:

In 2019 the IEEE 15288 series standards were converted to international standards. IEEE 15288.2 was reissued as ISO/IEC/IEEE 24748-8:2019 with no change to the technical content. In 2025 IEEE transitioned 15288.2 to inactive status, however the international standard remains active.

ISO/IEC/IEEE 24748-8:2019 should be cited on new contracts, documents, and publications in lieu of IEEE 15288.2.

Military and DoD employees may continue downloading the content of IEEE 15288.2 from ASSIST for internal use until ISO/IEC/IEE 24748-8 is updated by international standards bodies and adopted by DoD.

Description of the standard:

This standard provides requirements for technical reviews and audits to be performed throughout the acquisition life cycle for DoD and other defense agencies. This standard implements ISO/IEC/IEEE 15288.2, System Life Cycle Processes, to provide the definition, description, and intent, as well as the entry/exit/success criteria, for each technical review and audit. It is to be used to establish agreement between acquirers and suppliers on the technical reviews and audits that are needed for the project, as well as the focus and expectations of each. It is intended to be used together with the newer 2023 version of ISO/IEC/IEEE 15288 and ISO/IEC/IEEE 24748-7:2019 Standard for Application of Systems Engineering on Defense Programs, on contract, tailored as required, to express the government requirements for technical reviews and audits.

ISO/IEC/IEEE 24748-8:2019 was prepared by the Software & Systems Engineering Standards Committee of the IEEE Computer Society (as IEEE Std 15288.2:2014) and drafted in accordance with its editorial rules. It was adopted, under the "fast-track procedure" defined in the Partner Standards Development Organization cooperation agreement between ISO and IEEE, by Joint Technical Committee ISO/IEC JTC 1, Information technology, Subcommittee SC 7, Software and systems engineering. Copies of this document may be purchased via the web from the ANSI Webstore at https://webstore.ansi.org.

Proposed changes by DoD activities must be submitted to the DoD Adopting Activity at OUSD(R&E), Systems Engineering and Architecture, SE Policy and Guidance, 4800 Mark Center Drive, Suite 16F0902, Alexandria, VA 22308.

Area: SESS

DISTRIBUTION STATEMENT A. Approved for public release: Distribution in unlimited.
