# TIER I ADOPTION NOTICE

Sensor Open Systems Architecture (SOSA™) Ed. 2.0 (Snapshot 3) (SOSA-ED.2.0-SNAP3) was adopted on 19 May 2025 for use by the Department of War (DoW). To provide feedback on this Snapshot document, please send comments by email to ogspecs-snapshot-feedback@opengroup.org. For information on joining The Open Group SOSA™ Consortium, please send email to ogsosa-admin@opengroup.us or visit the website at www.opengroup.org/sosa. For DoW activities that are current SOSA™ members, proposed changes must be submitted in accordance with the SOSA™ Consortium Technical Working Group (TWG) Configuration Management (CM) process. Information regarding this technical standard, including copies of the latest published revision, may be obtained electronically from https://publications.opengroup.org/s251. To gain access to some documents, users must create an account with The Open Group, but do not need to be SOSA™ Consortium members.

This standard implements International Standardization Agreement (ISA) STANAG-3350, "ANALOGUE VIDEO STANDARD FOR AIRCRAFT SYSTEM APPLICATIONS - AAVSP-05 EDITION A", and ISA STANAG-4586, "STANDARD INTERFACES OF UA CONTROL SYSTEM (UCS) FOR NATO UA INTEROPERABILITY - AEP-84 EDITION A". When changes to or cancellation of either of these standards is proposed, the Adopting Activity should coordinate the action with the U.S. National Point of Contact for the international standardization agreements identified in ASSIST at https://assist.dla.mil.

The Open Group SOSA™ Consortium enables Government and industry to collaboratively develop standards and best practices to enable, enhance, and accelerate the deployment of affordable, capable, and interoperable sensor systems. The SOSA™ Consortium is creating system reference architectures applicable to military and commercial sensor systems and a business model that balances stakeholder interests. The architectures employ modular design and use widely supported, consensus-based, nonproprietary standards for key interfaces that are expected to:

- Reduce development cycle time and cost
- Reduce systems integration cost and risk
- Increase commonality and reuse
- Reduce sustainment and modernization cost
- Support capability evolution and mitigate obsolescence
- Enable technology transition
- Facilitate interoperability
- Isolate the effects of change

Custodians:
Army – CR6
Navy – AS
Air Force – 01

Adopting Activity:
OSW – SE
(Project MOSS-2026-004)

Reviewing Activities:
Army – AV, MI, AC
Navy – CG, CH, EC, MC, NM, SA
Air Force – 10, 11, 19, 20, 27
DLA - GS

NOTE: The activities listed above were interested in this document as of the date of this document. Since organizations and responsibilities can change, you should verify the currency of the information above using the ASSIST Online database at https://assist.dla.mil.
