DETAIL SPECIFICATION SHEET

SWITCH, TOGGLE, ONE POLE, ENVIRONMENTALLY SEALED, LEVER LOCK

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The complete requirements for acquiring the switch described herein shall consist of this specification and the latest issue of MIL-DTL-3950.

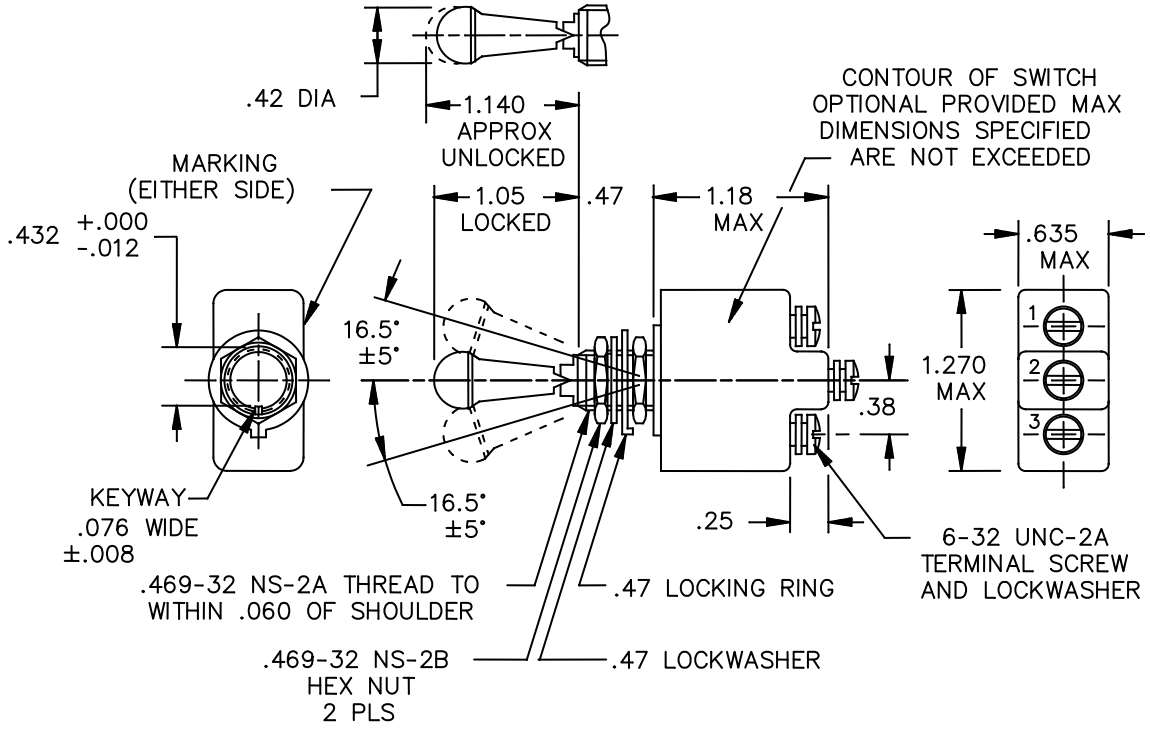

FIGURE1. Dimensions and configuration

Check the source to verify that this is the current version before use.

Inches	mm	Inches	mm
.005	0.13	.42	10.7
.008	0.20	.432	10.97
.012	0.30	.47	11.9
.020	0.51	.635	16.13
.060	1.52	1.05	26.67
.076	1.93	1.140	28.96
.25	6.49	1.180	29.97
.38	9.65	1.270	32.26

NOTES:
1. Dimensions are inches.
2. Metric equivalents are given for general information only.
3. Unless otherwise specified, tolerance is ± .020 (0.51 mm) for two place decimals and ± .005 (0.13 mm) for three place decimals.
4. For hardware and terminal screw detail specifications, see appendix of MIL-DTL-3950.
5. In event of a conflict between the text of this standard and the reference cited herein, the text of this standard shall take precedence.

FIGURE1. Dimensions and configuration - Continued

REQUIREMENTS

Locking arrangement Positive locking shall be accomplished and shall prevent motion of the toggle lever until the locking mechanism is manually released.

The force required to release the locking mechanism shall be 3 to 5 pounds.

The locking means at the top of the toggle bushing shall be capable of withstanding a torque of 20 inch-pounds applied in both directions immediately following the humidity test.

Part number example MS24658-21A (locking combination ‘A’).

All switches on this standard are designed so that the movement of the switch mechanism is opposite to that of the toggle lever

Maximum weight is .10 pound.

Electrical rating: See table I.
