MATERIAL: The reservoir shall be made of stainless steel. The cabinet shall be steel that is primed and finished with urethane enamel. All other materials shall be suitable for construction that will enable proper function and strength.

DESIGN: The bath shall consist of a metal cabinet containing a stainless steel reservoir, a heating unit, circulation system, refrigeration or cooling coil system and a control system. The unit shall be electrically operated and controlled to maintain a constant temperature within the tolerances and ranges expressed in the table. A reservoir cover shall be included.

NOTES: Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.

All electric components shall conform to the standards of the Underwriters Laboratories, Inc.

APPROVED 7 JAN 1983 REVISED

USER ACTIVITIES: ARMY - MD, DM
NAVY - MS

REVIEWER ACTIVITIES: ARMY - ME
NAVY - OS
AIR FORCE - 82

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
