MILITARY SPECIFICATION

CLEANING COMPOUND WITH CONDITIONER AND INHIBITOR
FOR ENGINE COOLING SYSTEMS

This amendment forms a part of Military Specification MIL-C-10597E dated 24 August 1984, and is approved for use by all Departments and Agencies of the DoD

Page 4

3.3 Inhibitor. The inhibitor shall conform to the requirements of MIL-A-53009 and be furnished in a 1 quart bottle meeting the requirements of section 5.1.1 of MIL-A-53009.

Page 6

4.3.3.1.1 Delete "and of inhibitor".

4.3.3.1.2 Add after "solution)", "of the inhibitor"

Page 11

4.3.4.9 Inhibitor. The chemical characteristics shall conform to the requirements of MIL-A-53009.

Page 12

6.1 Intended Use. Delete last sentence and replace with the following:

"When this is followed by the addition of the recommended inhibitor to the water, the radiator life is greatly increased. If antifreeze is added to the system, addition of the inhibitor will not be made."

Figure 2

Step 3 - Inhibiting Process. Delete paragraph and replace with the following:

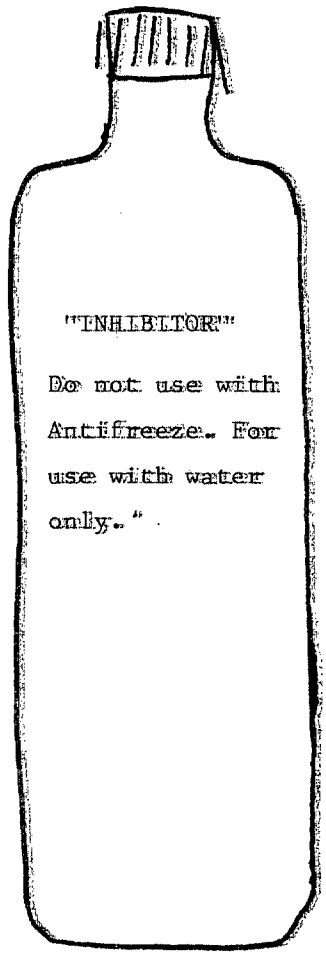

"Fill the cooling system to the proper level with water and add the inhibitor from the bottle marked "Inhibitor" at the rate of 3% by volume of the total cooling system capacity (1/2 qt for a 17 qt system). If antifreeze is used, no inhibitor is to be added to the solution.
