MILITARY STANDARD

AUTOMATED ENGINEERING DOCUMENT PREPRATION SYSTEM

REGULATORS AND NONPOWERED VALUES (HYDRAULIC, PNEUMATIC, AND VACUUM)

TO ALL HOLDERS OF DOD-STD-35-100A(MI):

1. THE FOLLOWING PAGES OF DOD-STD-35-100A(MI) HAVE BEEN REVISED AND SUPERSEDED THE PAGES LISTED:

NEW PAGE	DATE	SUPERSEDED PAGE	DATE
1	28 SEPTEMBER 1984	1	12 AUGUST 1978
2	28 SEPTEMBER 1984	2	12 AUGUST 1978
3	28 SEPTEMBER 1984	3	12 AUGUST 1978
4	28 SEPTEMBER 1984	4	12 AUGUST 1978
5	28 SEPTEMBER 1984	5	12 AUGUST 1978
6	28 SEPTEMBER 1984	6	12 AUGUST 1978
7	28 SEPTEMBER 1984	7	12 AUGUST 1978
8	28 SEPTEMBER 1984	8	12 AUGUST 1978
9	28 SEPTEMBER 1984	9	12 AUGUST 1978
10	28 SEPTEMBER 1984	10 THRU 11	12 AUGUST 1978

2. RETAIN THIS NOTICE PAGE AND INSERT BEFORE THE TABLE OF CONTENTS.

3. Holders of DOD-STD-35-100A(MI) will verify that page changes and additions indicated above have been entered. The notice page will be retained as a check sheet. This issuance, together with appended pages is a separate publication. Each notice is to be retained by stocking points until the Military Standard is completely revised or canceled.

1. SCOPE

1.1 General. This dash-numbered part of the Automated Engineering Document Preparation System (AEDPS), provides detailed requirements for the preparation Nonpowered Valves (Hydraulic, Pneumatic, and Vacuum).

1.2 Purpose This military standard provides the necessary information to prepare a Specification Requirement Sheet (SRS) which will be used to generate an MSE by automated data processing.

1.3 Utilization General instructions, quality assurance provisions, packaging, and notes, applicable to all AEDPS dash-numbered parts have been included in the basic document (DOD-STD-35) to avoid redundancy. Unless otherwise specified in this dash-numbered part, the following list contains additional subjects that are applicable to all AEDPS dash-numbered parts and are inclided in DOD-STD-35:

a. Writing Methodology
b. Document and Part Numbering
c. Applicable documents
d. Single and Multi-item Specifications (Tabulation)
e. Keyword Code Index (KCI)
f. General Requirements of AEDPS

1.4 Military Specification Exception Title Index. It is recommended that MIL-HNBK-227A, Selection and Use of Regulating and Control Valves be reviewed prior to using this dash-numbered part book.

The title code for an MSE shall be seleted from one of the MSE titles listed in the Title Index (see table I). Data bases have been established for the generation of MSE'S for the MSE titles indicated. If a suitable title code is not. contained in the Title Index, leave the title code spaces on the SRS blank, and attach a request for the assignment of a title code. lnclude in the requested the desired title and the base document identifier. A code will be assigned and the code, title, and base document will be made a part of the Title Index.

One of the six-digit codes listed in the Title Index, entered on an SRS, will specify that the title of the MSE will be the title shown in the Title Index.

Each MSE title listed in the Title Index is compatible with the document(s) listed with that title under base document. The list of base documents may or may not be a complete listing. The information shown under coverage is intended for the user’s reference; when

Check the source to verify that this is the current version before use.

more than one document is listed for an MSE title, this information will be found useful in determining which of the documents is most suitable for use as the base document.

The MSE title may or may not be the same as the title used in DODISS, FIIG, or the base document. In general, the MSE title uses the basic federal item name listed in Cataloging Handbook H6. However, titles with additional modifying and identifying words are provided to assist in defining the scope of the MSE. Also, less restrictive titles are provided to prevent exclusion of items.
