COMMERCIAL ITEM DESCRIPTION

PAPER, MIMEOGRAPH

The General Services Administration has authorized the use of this Commercial Item Description for all federal agencies.

This description covers cotton or linen, white mimeograph paper, white mimeograph bond paper, and white and colored mimeograph paper.

1. Classification.

Type I - 25 percent, white mimeograph (JCP B20).
Type II - White mimeograph bond (JCP G30).
Type III - Mimeograph, white and colored (JCP B10).

2. Salient characteristic:

A. Materials.

Type I - shall meet all requirements of JCP B20.
Type II - shall meet all requirements of JCP G30.
Type III - shall meet all requirements of JCP B10.
In addition, all types shall meet the requirements of Paragraph 4.

B. Basis weight. The basis weight of the mimeograph paper shall be as specified in the contract or order. (See Section 7).

C. Size and trim. Shall be as specified in the contract or order. (See Section 7).

Beneficial comments, recommendations, additions, deletions, clarification's, etc. and any data which may improve this document should be sent to General Services Administration, Federal Supply Service, Engineering Branch, 26 Federal Plaza, New York, NY 10278

Distribution Statement A: Approved for public release; distribution is unlimited.

D. Grain. Shall be as specified in the contract or order. (See Section 7).

E. Color. Types I and II mimeograph paper shall be furnished in white. Type III shall also be blue, buff, green, pink or yellow, as specified in the contract or order. (See Section 7).

F. Bleaching: To obtain an acceptable brightness, a chemical bleaching process may be used. When specified, (See Section 7), the bleaching process shall not include the use of chlorine, chlorine dioxide, or hypochlorite. Certification of compliance shall be made available upon request by the Government.

G. Workmanship. All types of paper in accordance with this specification shall be clean, free from dirt spots, oil spots, shives, foreign matter, and shall be uniform in color. The sheets shall be free from holes, tears, cuts, folds, scuff marks, lint, fuzz, or any particles. There shall be no splices within a sheet and there shall be no partial sheets. There shall be no defects that affect appearance or serviceability.

3. Quality Assurance Provisions. Responsibility for inspection. Unless otherwise specified in the contract, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in this commercial item description where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirement.

Table 1

Examine	Inspection Levels	AOLs (% defect)
Visual/Workmanship Defects	I	2.5
Dimensional Defects	S-3	4.0
Paper Characteristics	TAPPI	N/A
Preparation for Delivery	S-2	2.5

Sampling for examination and tests shall be performed in accordance with MIL-STD-105, using the plans as specified in Table 1, unless otherwise stated. For the purpose of sampling, a lot shall consist of mimeograph paper. The sample unit shall be 1 mimeograph paper for visual/workmanship and dimensional examination and one fully prepared shipping container for preparation for delivery examination, unless specified otherwise.

Testing, when applicable, shall be in accordance with Part 2, Testing Standards and Definitions, of the Government Paper Specification Standards published by the Joint Committee on Printing. (Note: See individual TAPPI's for specific sampling instructions).

Acceptance criteria shall be as specified in Part 4, Acceptance Criteria, of the Government Paper Specification Standards published by the Joint Committee on Printing.

4. Regulatory requirements. The contractor shall certify that the minimum content standard of all types of paper offered shall be no less than 50% recovered materials including 20% postconsumer materials in accordance with Executive Order 12873, section 504 (b), dated October 20, 1993 (See definition of postconsumer materials and recovered materials in sections 203 and 205). As an alternative to meeting the standards of section 504(b) for all printing and writing papers, the minimum content standard shall be no less than 50% recovered materials that are a waste material byproduct of a finished product other than a paper or textile product which would otherwise be disposed of in a landfill, as determined by the State in which the facility is located, in accordance with Executive Order 12873, section 504 (c), dated October 20, 1993. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4.1 Labeling of recycled content. The recycled content shall be marked on the product or unit pack.

5. Preservation, packaging, packing, labeling and marking. Preservation, packaging, packing, labeling and marking shall be as specified in the contract or order.

6. Application for copies of technical documents referenced herein: The issue date in effect on date of invitation for bids or request for proposal shall be apply.
