COMMERCIAL ITEM DESCRIPTION

BAG, SOILED CLOTHES

The General Services Administration has authorized the use of this commercial item description by all Federal agencies.

1. SCOPE. This description covers requirements for rope closing and self closing nylon laundry bags.

2. CLASSIFICATION. The laundry bags covered by this commercial item description shall be of the following Type and Size:

Type I - Self closing.
Type II - Rope closing.

Size A - 18 inch (45.7 cm) diameter.
Size B - 25 inch (63.5 cm) diameter.

3. SALIENT CHARACTERISTICS

3.1 Material. The bags shall be plain woven fabric made from either nylon, polyester, or a blend of nylon and polyester. The fabric shall have a minimum weight of 5.0 oz/sq yd (169 g/m^2) when tested in accordance with ASTM D 3776. The minimum breaking strength of the cloth shall be 200 pounds (890 N) in the warp and filling directions when tested in accordance with ASTM D 5034. The color of the cloth shall be a natural undyed white. When a yellow stripe is specified, the stripe shall be colored cotton or nylon cloth sewn to the base cloth, or shall be coloration permanently applied to the basic cloth. The color of the stripe shall be bright yellow, shade at the option of the contractor.

3.2 Type I, self closing bag. The type I self closing bag shall be a bag with an envelope-type cap cover capable of being turned over the top of the bag to form a complete closure, preventing the contents from spilling or being exposed when the bag is inverted. The bag shall be equipped with two loops at the top, inside of the fold-over flap, which shall provide hand grips when reversing the flap to close the bag. The loops shall be positioned so that by putting both hands under the flap and grasping the loops, a pulling motion outward and upward will reverse the position of the flap thereby closing the open top of the bag. Strain areas shall be suitably reinforced. The corners formed where the bottom of flap joins the body of the bag shall be reinforced with a gusset. The bag shall have the dimensions specified in table I and be similar in appearance to figure 1. When specified, the bag shall have a yellow stripe 2-1/4 inches (5.7 cm) wide minimum (finished) placed vertically around the bag, including the bottom. The stripe shall be placed on the flap so as to be visible when the flap is closed.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Branch (7FXEE), 819 Taylor Street, Fort Worth, TX 76102

3.3 Type II, rope closing. The type II bag shall have a round body with a square or rectangular bottom with rounded corners, or a round bottom, and a drawstring type of closure with a cordlocked drawstring. The top of the bag shall be folded over and sewn to provide a tube through which the drawstring passes. A corrosion resistant grommet of sufficient size to allow two of the drawstrings to pass through it easily shall be tightly inserted into the material of the tube. The grommet shall be reinforced with an additional piece of cloth of the same material. A nylon rope drawstring shall be inserted into the grommet, passed around the circumference of the top of the bag inside the hem, and back out through the grommet. Both ends of the drawstring shall be inserted into a plastic cordlock device that will allow free passage of the drawstring when held open and hold the cord securely when released or set to lock position. The rope shall have the ends fused to prevent raveling. The finished bag shall have the dimensions specified by table I, and shall be similar in appearance to figure 2.

Table I. Finished dimensions, inches (cm) minimum

Type, Size	Width 1/	Length 2/	Bottom Dimensions 3/
Type I			
Size A	29 (73.7)	45 (114.3)	12-1/2 (31.7)
Size B	38-1/2 (97.7)	45 (114.3)	16-1/2 (41.9)
Type II			
Size B	38-1/2 (97.7)	36 (91.4)	22 (55.8)

1/ Measured across the top of bag 1/2 to 1 inch (1.2 to 2.5 cm) below hem from side seam to side seam with bag folded flat in open position.
2/ Measured from top edge of bag to bottom seam with bag folded flat in open position.
3/ Side dimensions for square or rectangular bottom, or diameter of round bottom.

Type II
Rope closing bag.

3.4 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within tolerances specified and all other requirements of this document are met.

3.5 Workmanship. The bags shall be clean, the seams shall be straight without excess runoff, and shall be free of all defects which may affect appearance or serviceability.

4. REGULATORY REQUIREMENTS

4.1 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. QUALITY ASSURANCE PROVISIONS

5.1 Product conformance. The products provided shall meet the salient characteristics of this CID, shall conform to the producer's own drawings, specifications, standards, and quality assurance practices, and shall be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

6. PACKAGING, PACKING AND MARKING

6.1 Packaging, packing and marking. The packaging, packing, and marking shall be as specified in the contract or order.

7. NOTES

7.1 Intended use. The bags described by this commercial item description are intended for use in containing soiled clothing.

7.2 Ordering data. Purchases should select the preferred options permitted herein and include the following information in procurement documents:

a. Title, number, and date of this CID.
b. Type and Size.
c. The packaging, packing and marking desired

7.3 Part Identification Number (PIN). This part numbering system is intended for identification and cross-indexing of the item by the government only and does not constitute a requirement for the contractor.

Example: AA3079 / 1 B Stripe

- AA3079 — CID A-A-3079
- 1 — Type - 1 or 2
- B — Size - A or B
- Stripe — With yellow stripe (blank if no stripe).

7.4 National Stock Numbers. The following NSNs (with the appropriate part number) are known to use this document:

NSN	Type, Size	PN
8465-00-122-0362	Type I, Size A	AA3079/1A
8465-00-122-0363	Type I, Size B	AA3079/1B
8465-00-122-0364	Type I, Size B, With yellow stripe	AA3079/1BSTRIPE
8465-00-122-3869	Type II, Size B	AA3079/2B
