COMMERCIAL ITEM DESCRIPTION

SHIRT, DISPOSABLE

This Commercial Item Description is authorized for use in preference to MIL-S-87021.

Description - The shirt shall be a below-the-hip length style, have full-length set in one or two piece sleeves, a sewn-on collar and a full front opening secured by 5 plastic snap fasteners whose primary use is as part of an ensemble used to protect torpedo handlers from exposure to Otto fuels.

Material - The material for the collar, front, and sleeves shall be a white polyethylene coated spun bonded olefin conforming to type II, class B of MIL-C-87019. The coated side of the material is considered to be the face side. The material for the back shall be an uncoated spun bonded olefin conforming to type I of MIL-C-87019. The stitching thread and the plastic snap fasteners shall be of any commercial type suitable for the purpose intended. The color of the thread shall be natural or white. The color of the snap fasteners shall be white.

Sizes - The shirts shall be provided in the following sizes:

X-Small, Small, Medium, Large, X-Large, and XX-Large.

Label - A commercial type label is acceptable provided that an additional label containing the contractor's name, contract number, size, NSN, and cautionary statement is placed directly on the shirt by printing, stamping, stenciling or printed on a pressure sensitive label that will adhere to the inside of the garment. The cautionary statement shall be printed in larger letters than all other lettering on the label and shall read:

CAUTION: THIS GARMENT SHALL NOT BE REUSED AND MUST BE DISCARDED WHEN OTTO FUEL STAINS ARE OBSERVED.

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Officer in Charge, Navy Clothing and Textile Research Facility, Post Office Box 59, Natick, MA 01760-0001 by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter

Check the source to verify that this is the current version before use.

Measurements - The finished dimensions of the shirt shall be as indicated below. All measurements are expressed in inches.

Sizes	A Chest	B Inseam Sleeve Length	C Center Back Length
X-Small	20 ½	22 1/4	29 ½
Small	21 ½	22 1/4	30
Medium	23 ½	22 5/8	30 ½
Large	25 ½	23 1/8	31
X-Large	27 ½	23 1/2	31 ½
XX-Large	28 ½	23 7/8	32
Tolerances:	± 1	+1/2, -3/8	+1/2, -3/8

Note: Refer to Figure 1 for A, B, and C.

Patterns - The government shall furnish a single size pattern. The contractor is responsible for grading patterns for additional sizes. The government patterns shall be used to make the contractor's working patterns. The government patterns shall not be altered in any way. The working patterns may be modified to accommodate automation; however, if the working patterns are modified the design and measurements must be maintained as intended by government patterns. Commercial patterns may be used in lieu of government patterns provided they are approved for use by the government and conform to the cited design and finished measurements.

Workmanship - The finished shirts shall be thoroughly cleaned and all loose thread, lint, and foreign matter removed.

Product Demonstration Model - Offerers are required to submit shirts of their intended production and style. Product Demonstration Model will consist of units independently developed. Product Demonstration Models will be analyzed and evaluated by the government. Evaluation criteria and basis for award are contained in the solicitation. Product Demonstration Models will be retained by the government. One (1) Product Demonstration Model approved by DPSC under the resultant contract will serve as a manufacturing standard for the corresponding production items delivered under this contract. Offerers are advised that the Product Demonstration Model does not relieve the successful offerer of this responsibility to perform in accordance with the Commercial Item Description specified above.

Responsibility for inspection - The supplier is responsible for assuring the product conforms to the requirements. Shirt lots will be inspected to determine conformance with the Commercial Item Description and the successful offerer's technical proposal as negotiated. Acceptability of shirt lots will be determined by the use of "Sampling Procedures and Tables for Inspection by Attributes", ANSI Z1.4, published by the American Society for Quality Control. Sampling procedures will be designated by the Government at the time of award. The sample unit is one shirt. The shirt will be examined for commercial type defects only.

Defect - The shirt shall be examined for the following defects: any hole, cut, tear, mend, or burn; color not as specified; any spot or stain (outside); evidence of delamination of the coating; thread ends not removed; open seams; missing, broken or improperly functioning snap fasteners; not cut or fabricated in accordance with the product demonstration model; label missing, incorrect, or illegible; cautionary statement lettering not larger than all other lettering; measurement of item not as specified; and any variance not otherwise classified herein but at variance with the product demonstration model.

Packaging - Each shirt shall be folded to measure approximately 14 by 11 inches.

Packing - Eighty (80) shirts of one size only, packaged as specified above, shall be packed in a fiberboard shipping container assembled, closed and reinforced conforming to type CF, class domestic, variety DW, grade 275, size 3A of MIL-B-17757. The fiberboard for the box liner shall conform to type CF, class domestic of MIL-B-17757. The shirts shall be packed flat, two in length, one in width, and forty in depth within a shipping container. Each container shall have the contents completely covered on top and bottom with a sheet of commercial grade kraft paper. The box shall be closed in accordance with the box specification.

Marking - In addition to any special marking required by the contract or order, unit packs, intermediate or exterior containers and palletized unit loads shall be marked in accordance with the requirements of MIL-STD-129.

Palletization. When specified in the contract, items packed as specified above, shall be palletized on 4-way entry pallet in accordance with load, type Ia of MIL-STD-147. Each prepared load shall be bonded with primary and secondary straps in accordance with the bonding methods C and D or Film bonding F or G. Pallet patterns shall be in accordance with the appendix of MIL-STD-147. The pallet shall be 4-way, type IV; type V, class 1, size 2; or type VIII fabricated from wood group I, II, or IV, grade A of NN-P-71, or 4-way, style 1, size A, type I, class 1 fabricated from wood groups specified in MIL-P-15011. Interlocking of loads shall be effected by reversing the pattern of each course. If the container is of a size which does not conform to any of the patterns specified in MIL-STD-147, the pallet pattern used shall first be approved by the contracting officer.
