DATA ITEM DESCRIPTION

TITLE: COURSE CONFIGURATION DOCUMENTATION PLAN

Number: DI-SESS-81695 **Approval Date:** 20061023
AMSC Number: 7610 **Limitation:**
DTIC Applicable: No **GIDEP Applicable:** No
Office of Primary Responsibility: AFIT/LS/SEA04L1
Applicable Forms: None
Use/relationship: The Course Configuration Documentation Plan will provide an outline to show how the course will be configured.

This Data Item Description (DID) contains the format, and content preparation instructions for the data product generated by the specific and discrete task requirement delineated in the contract.

Requirements:

1. Reference Documents. The applicable issue of this document cited herein, including its approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. Format. The Course Configuration Documentation Plan shall be in the contractor's format.

3. Content. The plan shall contain the following:

a. Naming conventions
b. File placement

File naming convention shall not be overly complex. (e.g., clear module folder names and file structure should be easily recognizable.) Files used more than once should reside in the main directory of the course (e.g., Image.gif used in all modules should reside in the image folder within the main directory of the course and not in a module directory.

3.2 Course folder shall be broken down by module so the government will be able to tell that a particular course file belongs to Module X and is on page Y of that module.

3.3 Module folders shall contain supporting subfolders (example: flash, source, and image).
