COMMERCIAL ITEM DESCRIPTION

LINER, TOILET BOWL

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers the requirements for toilet bowl liners. The liners are to be used in waterless, immediate waste consuming, electric-incinerating toilet systems.

Salient characteristics:

Liners shall be fabricated of commercial grade kraft paper, 22 to 30 pounds basis weight (24x36-500), coated with 5 pounds of polyethylene. Basis weight of the paper shall be determined in accordance with TAPPI Method T-410.

The liner shall be designed to be folded and pleated to form a cup, compatible with Research Products Manufacturing Company Model T R Industrial Toilet.

The issue of each TAPPI test method in effect on the date of the solicitation shall be used to determine compliance with these requirements.

Dimensions. The overall dimensions before folding and pleating shall be 18 inches long by 12 inches wide.

Workmanship. Liners shall be free of holes, tears, or other defects that may impair serviceability and durability.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specification, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, Packing, and Marking. The items shall be packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Unform Freight Classification. Shipping containers shall be marked as specified in the contract or order.

Copies of TAPPI test methods are available from the Technical Association of the Pulp and Paper Industry, One Dunwoody Park, Atlanta, GA 30341.
