COMMERCIAL ITEM DESCRIPTION

ALUMINUM FOIL (FOOD HANDLING AND PROCESSING)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification QQ-A-1876, Type I, Grade A.

This description covers uncoated aluminum foil suitable for food handling and processing applications.

Salient characteristics:

The aluminum foil shall conform to the requirements of ASTM B 479.

The foil shall comply with the provisions of the Federal Food, Drug and Cosmetic Act, Food Additive Amendment.

The thickness, width, and length of the foil shall be as specified.

The issue of each ASTM test method in effect on the date of the solicitation shall be used to determine compliance with these requirements.

Workmanship. The aluminum foil shall be of uniform quality and condition, and shall be free of defects which affect serviceability.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Packaging, packing and marking. The items shall be packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.

ASTM standards are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.
