COMMERCIAL ITEM DESCRIPTION

FRAME, JEWELERS' SAW (ADJUSTABLE LENGTH)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification GGG-F-671.

This commercial item description covers jewelers' saw frames primarily used for very light duty in cutting precious and common metals by jewelers and instrument makers. Frames furnished shall be without blades.

Salient characteristics:

Material.

(a) Medium throat style frame shall be steel or other suitable material capable of withstanding a 6-ft drop on concrete.
(b) Deep throat style frame shall be steel.
(c) Handles shall be plastic or seasoned hardwood (lacquered or suitably painted).

Frame finish.

(a) Medium throat shall have zinc chromate or plating.
(b) Deep throat requires no plating or coating; a polished finish is acceptable. Contraction due to tension: 1/2 inch maximum permitted.

Design. Adjustable length jewelers' saw frames conforming to table I and similar to figures 1 or 2.

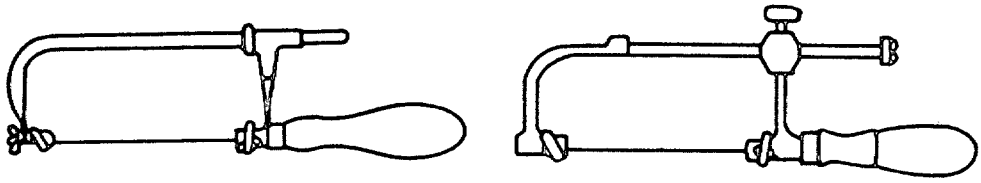

Figure 1. Medium throat jewelers' saw frame, adjustable length

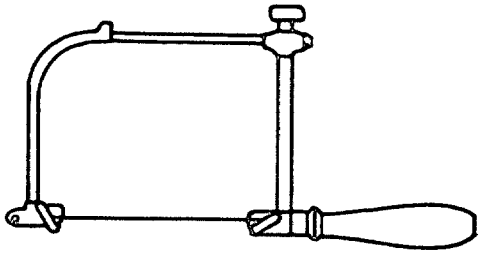

Figure 2. Deep throat jewelers' saw frame, adjustable length.

Table I. Dimensions, weight, and tension between saw grips. Medium and deep throat style.

National Stock Number and throat style	Capacity (blade length)	Depth from teeth of blade to nearest inside edge or projection of frame		Weight (approximate)	Tension between saw grips (minimum)
		Minimum	Maximum		
	(Inches)	(Inches)	(Inches)	(Ounces)	(Pounds)
5110-00-223-4972 Medium throat	3 to 6, incl.	2	3	6	25
5110-00-223-4970 Deep throat	3 to 6, incl.	5-1/4	6-1/4	8	20

Workmanship. The frames shall be free from imperfections which may affect their appearance, serviceability, or durability.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Preservation, packaging, packing, and marking. The preservation (when applicable), packaging, and packing shall be in accordance with normal commercial practice and shall assure acceptable by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.
