COMMERCIAL ITEM DESCRIPTION

EGG BEATER

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification RR-E-300.

Salient characteristics:

Length 10 7/8 to 13 1/2 inches, double agitators four wings each, ferrous parts nickel or chromium plated.

Type I - Die Cast Components (Heavy Duty)
Type II - Stamped Metal Components (Light Duty)

Performance. Beaters shall operate smoothly without gear or pinion crumbling, deformation, slipping, or binding.

Workmanship. The egg beaters shall be free from sharp edges, projections which may cause injury to user, flaws, cracks, indentations on tubing, or malformed parts that affect functioning. All surfaces shall be smooth and free of dirt, oil, grease and other foreign matter, rough grind, die, and trimming marks, pits, scale, peel, chips, and blisters. Item shall be free from any defects that would affect serviceability or appearance.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.

Note: Purchaser should specify type.
