COMMERCIAL ITEM DESCRIPTION

POUCH, LIQUID ABSORBENT

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers disposable liquid absorbent pouches.

Salient Characteristics:

Shall be throw-away (disposable) absorbent pouches, suitable for containing aqueous solution spillages within an inserted package (e.g. bag or container).

Shall be supplied in the following milliliter (ml) absorbent capacity and pouch sizes:

A 200 ml liquid absorbent capacity in an overall dimensioned 3 X 4 inch pouch.

A 400 ml liquid absorbent capacity in an overall dimensioned 5 X 5 inch pouch.

Shall be suitable for absorbing spillages of urine, blood, and biohazardous fluids. Shall be suitable to contain cross contamination and package leakage.

Shall include absorbent material consisting of superabsorbent polymers that are capable of rapidly absorbing an aqueous solution spillage and containing the absorbed spillage within a pouch. The absorbent polymers in each pouch shall be capable of rapidly absorbing liquid and containing it within the pouch in a capacity of up to at least 500 times their dry state volume.

Shall have the absorbent polymer material included in each pouch. The pouch shall be a throw-away (disposable), heat-sealed, flow-through tissue pouch. The absorbent polymer material shall expand upon contact with an aqueous solution spillage penetrating the tissue pouch. The absorption shall contain the spillage within the pouch.

AMSC N/A FSC 6530

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Workmanship. The liquid absorbent pouches shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Package (PG). One package containing one thousand pouches of the ml specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Inspections and testing. Inspections and testing shall be conducted on the liquid absorbent pouch in accordance with commercial practice. Sampling for inspection and testing shall be in accordance with commercial practice.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard 376, and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. (Absorbent capacity required, intermediate/ exterior package quantities, labeling, and marking must be specified in the contract and/or order.)

NOTE: The following National Stock Numbers are covered by this document.
