COMMERCIAL ITEM DESCRIPTION

BAG, SPECIMEN

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers mailing bags for leakproof shipping of containers with biomedical specimens.

Salient Characteristics:

Shall be sealable transparent mailing bags that are suitable for leakproof shipping of containers with urine or blood specimens. Each bag shall have an envelope or pouch type opening and an extended lip or flap with an adhesive for self-sealing closure of the bag.

Shall be mailing bags with the following outside dimensions for the pouches:

4-1/2 Width X 6-1/2 Long (inches)
5 Width X 6-1/2 Long (inches)

The 4-1/2 X 6-1/2 inch size bag shall accomodate an inserted screw capped bottle having overall dimensions of 3-1/2 inch high and 2-1/4 inch diameter or 2 inch square (as measured at center of the bottle). The 5 X 6 inch size bag shall accomodate an inserted screw capped bottle having overall dimensions of 3-3/4 inch high and 2-1/2 inch in diameter or square (as measured at center of the bottle).

Shall be fabricated from heat sealable 3 mil thick nylon/polyethylene sheet material that provides a barrier against the transfer of odor, air and moisture.

Shall be designed such that the bag closures and sealings can be accomplished by a self-sealing adhesive closure and/or by heat sealing.

AMSC N/A FSC 6530

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Shall have each bag constructed to provide a pouch opening along the shorter dimension (width) with a two (2) inch extended lip above the opening. The front and back sheetings forming the pocket for the pouch shall be heat sealed along the outside edges for both the lengths and widths. The lip shall include a perforation reference line and a self-sealing adhesive strip. The adhesive strip shall be supplied with a liner covering that is readily removable when the bag is ready for use.

Shall have each bag constructed with a tear notch to facilitate easy opening of the bag after closure.

Shall be constructed so that folding the self-sealing adhesive closure at the perforation of each bag creates a non leak barrier that acts as a liquid containment seal.

Shall have construction of each bag such that in closure:

The bag is odorproof, moisture proof, leak proof, and puncture and tear resistant.

Any unauthorized attempt to tamper with or open the sealed bag will be evident by the action of adhesive stretching the sheet material, and the perforated line ripping the top of the seal.

Workmanship. The specimen mailing bags shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Package (PG). One package containing one thousand bags of the sizes specified constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Inspections and testing. Inspections and testing shall be conducted on the specimen bag in accordance with commercial practice. Sampling for inspection and testing shall be in accordance with commercial practice.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard 376, and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. (Size bag required, intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.)

NOTE: The following National Stock Numbers are covered by this document.

NATIONAL STOCK NUMBER	ITEM IDENTIFICATION	SIZE
6530-01-307-5430	BAG, SPECIMEN, Nylon and Polyethylene, Transparent, 4-1/2 by 6-1/2 inches, 1000's	4-1/2 by 6-1/2 inches
6530-01-307-5431	BAG, SPECIMEN, Nylon and Polyethylene, Transparent, 5 by 6-1/2 inches, 1000's	5 by 6-1/2 inches

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
