DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188
Exp. Date: Jun 30, 1986

1 TITLE	2. IDENTIFICATION NUMBER
Backshop Failure Report Serialized Control	DI-ILSS-80054

3 DESCRIPTION/PURPOSE
This Data Item Description (DID) is required to provide current and predicted reliability levels of serialized electronic components which are removed from a higher level assembly and routed to a back shop for failure resolution and repair.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC REQUIRED	6b. GIDEP REQUIRED
850923	F/AFLC-WRALC		

7. APPLICATION/INTERRELATIONSHIP

7.1 This DID contains the format and content preparation instructions for a reliability and serialized control system as required by task 104 of Mil Std 785.

7.2 This DID is applicable to the acquisition and repair of military systems and equipment.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
	AFTO 303	F3678

10. PREPARATION INSTRUCTIONS

10.1 Source document. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments and revisions, shall be as reflected in the contract.

10.2 Specific Instructions.

10.2.1 Enter original failure report number as specified in contract.

10.2.2 Enter location of activity performing the backshop maintenance.

10.2.3 Enter date of report in year, month, day format.

10.2.4 Enter name of original failed section or assembly.

10.2.5 Enter serial number of original failed section.

10.2.6 Enter name of module, circuit assembly, or unit being repaired.

10.2.7 Enter part number of the module, circuit assembly, or unit being repaired.

10.2.8 Enter the reference designator or circuit assembly for the unit being replaced.

10.2.9 Enter the serial number of the module, circuit assembly for the unit being replaced.

10.2.10 Enter failed component name.

10.2.11 Enter failed component reference designator or circuit symbol.

Check the source to verify that this is the current version before use.

10. Preparation Instructions (cont'd)

10.2.12 Enter disposition code of unit assembly or component that has been replaced.

10.2.13 Enter part number of the new item installed.

10.2.14 Enter serial number of new item installed. If non-serialized, enter "N/A".

10.2.15 Narrate cause of failure in detail. Indicate general condition of unit as a whole. Indicate condition of components through visual inspection. Indicate evidence of contributing factors to unit or component failure.

10.2.16 Narrate all corrective actions including preventive maintenance performed on unit.

10.2.17 Print name of individual performing repair.

10.2.18 Enter date repair was completed.

10.2.19 Print name of inspector.

10.2.20 Enter date of inspection.
