10 PREPARATION INSTRUCTIONS

10.1 Contract - This data is generated by the contract which contains a specific and discrete work task to develop this data product.

10.2 General - The Ammunition Test Expenditure Report shall delineate all forecasted ammunition expenditure requirements for the next twelve months and the actual ammunition expended during the month preceding the report.

10.3 Format - The Ammunition Test Expenditure Report shall be prepared on 80 column PCM cards in accordance with the format delineated in the Instructions for PCM cards (see 10.4.1). If a contractor keypunch capability does not exist and subject to Government approval, the Ammunition Test Expenditure Report may be prepared on bond paper or any 80 column form in the required format.

10.4 Content - The Ammunition Test Expenditure Report shall consist of sets of keypunched PCM cards. Each set consists of two cards numbered T1 and T2. A set of keypunched PCM cards is required for each ammunition type (DODIC - Department of Defense Identification Code) and for each specific test. This may result in multiple sets of keypunched PCM cards for each ammunition type and for each specific test.
