COMMERCIAL ITEM DESCRIPTION
SPECIFICATION SHEET

COUPLING ASSEMBLY, HOSE (GARDEN, WATER, AND WATER SUCTION), LONG SHANK WITH OCTAGON OR HEX SWIVEL, TYPE I, STYLE 3

The General Services Administration has authorized the use of this commercial item description for all federal agencies.

The complete requirements for procuring the hose coupling assemblies described herein shall consist of this document and the latest issue in effect of A-A-59614.

CLASSIFICATION/PART OR IDENTIFICATION NUMBER (PIN). This commercial item description (CID) specification sheet uses a classification system which is included in the PIN as shown in the following example (see NOTES).

SALIENT CHARACTERISTICS.

Interface and physical dimensions. Coupling assemblies supplied to this CID specification sheet shall meet the general requirements specified in A-A-59614 and be as specified herein (see figure 1).

AMSC N/A

FSC 4730

Check the source to verify that this is the current version before use.

Construction. Unless otherwise specified, style 3, type I coupling components shall consist of the following (see figure 1):

a. Female section.
b. Swivel nut for female section.
c. Male section.
d. Threads GHT, NH, or NPSH in accordance with A-A-59614.
e. Gasket recess in swivel (recess may be omitted provided the standard commercial gasket does not fall out when the two sections are disconnected).
f. Four hose clamps or compression ferrules (outside crimp), two for each male and female section.

Materials. Coupling parts shall be cast or machined from copper alloy (brass), corrosion resistant steel (CRES), steel, or zinc-base alloy, see table I.

TABLE I. Coupling material.

Material designator	Material	Plating
B	Copper alloy (brass)	---
R	CRES	---
S	Steel	Zinc
Z	Zinc-base alloy	Zinc

Class A couplings (garden hose). When attached to hose, class A couplings shall be able to withstand hydrostatic proof pressure of 100 psi for at least one minute without showing any signs of leakage.

Class AA couplings (water hose). When attached to hose, class AA couplings shall be able to withstand a hydrostatic proof pressure test of 150 psi for size .750 through 1.000 inch, 125 psi for sizes 1.250 and 1.500 inch, 100 psi for sizes 2.000 through 6.000 inch, for at least one minute without showing any signs of leakage, see figure 1.

Class A and class AA size and size codes. For available hose sizes and size codes for class A and class AA couplings see table II. Hose size and connection size are the same except for class A garden hose which are all 3/4 GHT.

Check the source to verify that this is the current version before use.

TABLE II. Size codes for class A and AA. 1/

PIN size code	Class A size	Class AA size
-04	.500	—
-05	.625	—
-06	.750	.750
-08	—	1.000
-10	—	1.250
-12	—	1.500
-16	—	2.000
-20	—	2.500
-24	—	3.000
-28	—	3.500
-32	—	4.000
-34	—	4.500
-40	—	5.000
-48	—	6.000

1/ The size indicates the nominal size of the coupling to fit the hose inside diameter (ID). For example, size .500 is for a coupling to fit the.500 inch nominal ID hose.

TABLE III. PIN codes for type, class, thread, hose clamp or compression ferrule.

Type, class, and thread designator	Class (see table II)	Thread type	Hose clamp type designator (see figure 2)	Compression ferrule designator (see table V)
1G	A	3/4 GHT	A, B, C, D, E, or F	CA, R, or Z
1W	AA	NH	A, B, C, D, E, or F	CA, R, or Z
1WS	AA	NPSH		
1WG 1/	AA	3/4 GHT		

1/ For PIN code hose size -06 only.

Coupling hose threads for class A (garden hose) . Coupling hose threads for class A shall be 3/4 garden hose threads (GHT). Thread is same for all size hose's see table II. Not compatible with other thread types and requires a gasket seal also refer to A-A-59614 and table III.

Coupling hose threads for class AA (Water hose). Coupling hose threads for class AA shall be either NH or NPSH in accordance with FED-STD-H28/10, also refer to A-A-59614 and table III, requires a gasket seal.

NOTE: NH and NPSH threads are not interchangeable.

Class A and class AA size and size codes. For available hose sizes and size codes for class A and class AA couplings see table II. Hose size and connection size are the same except for class A garden hose which are all 3/4 GHT see table IV.

Check the source to verify that this is the current version before use.

Table IV. Garden hose long shank to 3/4 GHT.

Garden hose long shank to 3/4 GHT	
Male	Female
.500 Long shank x 3/4 "-11.5 GHT Male	.500 long shank x 3/4 "-11.5 GHT Female
.625 long shank x 3/4 "-11.5 GHT Male	.625 long shank x 3/4 "-11.5 GHT Female
.750 long shank x 3/4 "-11.5 GHT Male	.750 long shank x 3/4 "-11.5 GHT Female
1.000 shank x 3/4 "-11.5 GHT Male	1.000 long shank x 3/4 "-11.5 GHT Female

Hose clamps. Hose clamps shall be in accordance with A-A-52506, see figure 2 for hose clamp types and designators.

Compression ferrule. Compression ferrules shall be in accordance with A-A-59614, see table V for material designators.

TABLE V. Compression ferrule material designators.

Designator	Material	Plating
CA	Copper alloy (brass)	---
R	Corrosion resistant steel (CRES)	---
S	Steel	Zinc

Hose clamps and compression ferrules. Four (4) hose clamps or compression ferrules shall be furnished for each coupling assembly.

Hose clamps and compression ferrules installation. Hose clamps or compression ferrules shall not extend closer than .062 inches to the end of the shank.

Tightening provisions. Wrenching surfaces may be octagon or hexagon and shall be located on the swivel nut only.

Check the source to verify that this is the current version before use.

Hose size	C min.
.500	1.125
.625	1.125
.750	1.125
1.000	2.000
1.250	2.000
1.500	2.500
2.000	3.500
2.500	4.000
3.000	5.000
3.500	5.500
4.000	5.750
4.500	5.875
5.000	5.875
6.000	6.500

NOTES.
1. Dimension A shall be sized so as not to restrict the free flow of the hose attached.
2. Dimension B shall be as required to accommodate the hose specified.
3. Dimension C shall be as required to meet the pull-off and leakage requirements and to accommodate the required hose clamp(s) or ferrule(s).

Commercial products. As part of the market analysis and research effort, this CID specification sheet was coordinated with the following manufacturers of commercial products. At the time of CID specification sheet preparation and coordination, these manufacturers were known to have commercial products that would meet the requirements of this CID specification sheet. (NOTE: This information should not be considered as a list of approved manufacturers or be used to restrict procurement to only the manufacturers shown.)
