DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. TITLE	2. IDENTIFICATION NUMBER
Contractor Validation Plan	DI-MISC-80759A

3. DESCRIPTION / PURPOSE

3.1 The Contractor Validation Plan presents the philosophy, test logic, sequence and test schedules, and test procedures to be utilized in the development of the contractor special inspection equipment (SIE).

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
920428	A/MICOM		

7. APPLICATION / INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 This DID supersedes DI-MISC-80759.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		A6735

10. PREPARATION INSTRUCTIONS

10.1 Format. The Contractor Validation Plan format shall be contractor selected. Unless effective presentation would be degraded, the initially used format arrangement shall be used for subsequent submissions.

10.2 Content. The Contractor Validation Plan shall briefly describe the test equipment being validated and the contractor's quality methods of controlling SIE including software. The plan shall contain the following:

10.2.1 Philosophy. A summary of the test station theory of operation.

10.2.2 Method of test. A brief description of the production flow with respect to the test station (i.e., flow charts, etc.).

10.2.3 Schedules of performance. Time frame of validation performance.

(Continued on Page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A:
Approved for public release, distribution is unlimited.
