DATA ITEM DESCRIPTION
Title: QUALITY ENGINEERING INSPECTION REQUIREMENTS AND EQUIPMENT LIST

Number: DI-QCIC-80756A
AMSC Number: 9851
DTIC Applicable:
Preparing Activity: MI
Applicable Forms:

Approval Date: 20170804
Limitation:
GIDEP Applicable:
Project Number: QCIC-2017-006

Use/Relationship:

a. The Quality Engineering Acceptance Inspection Requirements and Equipment List identifies areas where documentation is available, and where it must yet be prepared.

b. This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement delineated in the contract.

c. Quality Engineering Inspection Requirements and Equipment List is applicable to contracts that specify the requirement for Government monitoring of the contractor's technical documentation effort.

d. It also identifies required or existing Quality Assurance Provisions (QAP), or existing supplementary Quality Assurance Provisions (SQAP) as well as the Special Inspection Equipment (SIE) needed for build and rebuild of hardware.

e. This list provides the status of quality engineering documentation to plan work, and to cross index the quality engineering documentation to the design engineering documentation.

f. This DID may be used when the provisions of ISO9001 apply to the contract. This document may be obtained from **www.iso.org**

Requirement:

1. Content. The Quality Engineering Inspection Requirements and Equipment List shall be in the following format and contain the data as shown. Data shall be indexed by generation breakdown and hardware drawing number sequence. Data shall include a cross-reference index for acceptance of rebuild in the contractor's plant or depot (when required).

Column (No. & Heading)	**Information**
a. Number	**Part or assembly number**
b. Nomenclature	**Name of part or assembly**
c. Level	**The generation breakdown of the or assembly (Major End Items "1")**
d. End Item Code	**The End Item Code of the part part or assembly.**

Check the source to verify that this is the current version before use.

e. QAP (see Table 1)	**The source of inspection engineering requirements and preproduction (environmental) criteria.**
f. Spec No.	**A number in parenthesis indicates it is scheduled but has not been released.**
g. QAP	**"QAP" Requirement indicates the need for a QAP and the QAP number in parenthesis indicates an unvalidated QAP.**
h. Rev.	**QAP revision level released. (# indicates new release).**
i. SIE or Commercial	**SIE Test Equipment Number used in the performance of a QAP or around which a QAP should be written. Identify rebuild or depot test equipment when different from build test equipment.**
j. P/PCI	**Preproduction/Production comparison inspection is contained in QAP.**
k LET	**Limited Environmental Test contained in QAP.**
l. SQE	**Storage Quality Evaluation contained in QAP.**
m. Supply Source	**The present source of supply is indicated in this column as follows:** **C - Company** **S- Subcontractor of company** **V- Vendor/supplier of company** **G -Government Furnished Equipment (GFE)** **O-Other.**

Check the source to verify that this is the current version before use.

n. Spare*	**"Y" – Yes, can be provisioned as a Spare as it has adequate QAP, engineering requirements and provision for tes Equipment.** **"N" - No, does not have adequate QAP, or Engineering Requirements to be Provisioned as a spare Special Inspection Equipment is not feasible due to cost or other reason.**
o. Notes (See Table 2)	**Notes referenced by Code Letter in this column are Listed in Table 2.**
p. Change Identification	**"A" – Item added since last revision.** **"C" – Indicates a change since The last revision.**

***Item (n) is not to be used as spares provisioning list. When approved by the Government Product Assurance element, this coding input to the spares provisioning conferences.**

Column (No. & Heading)	Information
Table 1	Column e. QAP
Code	Explanation
Notes	QAP contained in notes on drawing.
SPEC	QAP contained in Section 4 of specifications.
G-SQ	QAP contained in General SQAP or General QAP.
SQ	QAP contained in Specific SQAP or Specific QAP.
None	Requires no functional test at this level.

Table 2	Column o. Notes
Code	Explanation
Q	Requires a ISO9001/AS9100 Quality Program.
I	Requires ISO9001/AS9100 Inspect System.
P	Proprietary Item
H	Higher assy. Level testing is required.
D	Duplication of tooling impractical.

END OF DI-QCIC-80756A
