ADOPTION NOTICE

ISO/IEC 15939: 2007, **Systems and software engineering – Measurement process**, was adopted on 19 Mar 2003 [original title was "Software engineering – Software measurement process'] for use by the Department of Defense (DoD). For suggestions or queries by DoD activities, please contact the Systems Engineering office of the DoD Adopting Activity: ODDR&E, 3030 Defense Pentagon, 3B938, Washington D. C. 20301-3090.

Copies of this document may be purchased from http//:webstore.ansi.org or International Organization for Standardization, 25 West 43rd Street, New York, NY 10036, (212) 642.4900. Check for DOD discount.

ISO/IEC 15939:2007 defines a measurement process applicable to system and software engineering and management disciplines. The process is described through a model that defines the activities of the measurement process that are required to adequately specify what measurement information is required, how the measures and analysis results are to be applied, and how to determine if the analysis results are valid. The measurement process is flexible, tailorable, and adaptable to the needs of different users.

ISO/IEC 15939:2007 identifies a process that supports defining a suitable set of measures that address specific information needs. It identifies the activities and tasks that are necessary to successfully identify, define, select, apply and improve measurement within an overall project or organizational measurement structure. It also provides definitions for measurement terms commonly used within the system and software industries.

ISO/IEC 15939:2007 is consistent with the ISO/IEC 15288:2008 and ISO/IEC 12207:2008. ISO/IEC 15939 was prepared by Joint Technical Committee ISO/IEC JTC 1, Information technology, Subcommittee SC 7, Systems and software engineering.

This second edition cancels and replaces the first edition (ISO/IEC 15939:2002), which has been technically revised to include both systems and software measurement.

Custodians:
Army – AM
Navy – AS
Air Force – 10

Adopting Activity:
OUSD (AT&L) SSE
(Project # SESS-2009-016)

Area: SESS
