ADOPTION NOTICE

ISO 18025, “Information Technology-Computer Graphics and Image Processing, Environmental Data Coding Specification (EDCS),” was adopted on July 11, 2005, for use by the Department of Defense (DoD). Proposed changes by DoD activities must be submitted to the DoD Adopting Activity: Defense Modeling and Simulation Office, Attn: Standards, 1901 N. Beauregard Street, Alexandria, VA 22311-1705. Electronic versions of the document may be downloaded from the SEDRIS Organization at http://www.sedris.org/. Copies may also be purchased from the International Organization for Standardization at http://www.iso.org or from the InterNational Committee for Information Technology Standards (INCITS) at http://www.incits.org/ or by contacting the INCITS Secretariat, c/o Information Technology Industry Council, 1250 Eye Street NW, Suite 200, Washington, DC 20005, Phone 202-737-8888, Fax 202-638-4922, and Email incits@itic.org.

ISO 18025 supports the encoding and communication of qualitative and quantitative information associated with physical environments, both real and virtual. This is accomplished by specifying nine EDCS dictionaries of environmental concepts and the EDCS application program interface. The International Standard specifies labels and codes to provide a standard way of identifying concepts; it also specifies environmental phenomena. ISO/IEC 18025 is part of the Synthetic Environmental Data Representation and Interchange Specification (SEDRIS) suite of international standards.

Note: This document may also be cataloged under the designation “ISO/IEC 18025.”
