MIL-P-14830A(MU)
AMENDMENT 1
1 June 1971

MILITARY SPECIFICATION

PROJECTILE, 81MM, H.E., M374A1 METAL PARTS ASSEMBLY
(ALLOY STEEL)

This amendment forms a part of Military Specification MIL-P-14830A(MU) dated 16 February 1970.

Paragraph 4.3.2.3 delete in its entirety.

Paragraph 4.3.2.7 for MAJOR characteristic 114. delete "or not full".

Paragraphs 4.3.2.8 and 4.3.2.9 add "Drawing F7548319" to heading.

Paragraph 4.3.4.2 delete in its entirety.

Paragraphs 4.3.4.3 and 4.3.4.4 line 2 delete "and II", line 4 delete "or the production lot represented by the sample".

Add paragraph 4.3.6
"4.3.6 Production lot sample.- Projectile body assemblies shall be subjected to all inspections and tests required by the drawings and specifications. The samples shall be selected as follows: Production lots with five or more heats of steel shall be represented by two samples from each heat of steel. Production lots with less than five heats of steel shall be represented by ten samples. No one heat of steel shall be represented by less than two samples. Failure of any one sample to comply with the requirements of the applicable drawings and specifications shall be cause for rejection of the lot represented by the sample."

Add paragraph 4.4.7
"4.4.7 Production lot sample.- The samples supplied in accordance with 4.3.6 shall have dimensional and all nondestructive testing performed at the contractors plant by the Government representative. The mechanical properties shall be tested in accordance with 4.4.1. The testing shall be conducted at an independent facility approved by the contracting officer. The Government (responsible technical agency) reserves the right to inspect or test any partial or complete production sample to be assured that the prescribed requirements comply."

Paragraph 5.1 add to end of sentence "and Drawing F7548319".
