MIL-D-81303A(AS)
Amendment 1
10 May 1967

MILITARY SPECIFICATION

DESIGN AND EVALUATION OF CARTRIDGES FOR STORES SUSPENSION EQUIPMENT

This amendment forms a part of Military Specification MIL-D-81303(AS) dated 22 August 1966 and has been approved by the Naval Air Systems Command, Department of the Navy.

Page 6, after existing paragraph 3.3.12.1, add new paragraph as follows:

"3.3.12.2 Construction of cartridge head. The cartridge head shall be provided with an internal shoulder to support the ignition element. The ignition element shall be installed from the propellant cavity end of the cartridge case."

Page 6, paragraph 3.4.1, delete the second sentence in its entirety.

Page 7, paragraph 3.4.5, in the second sentence after the word "damage", delete the remainder of the sentence.

Page 13, paragraph 4.2.4, in the last sentence delete the words "or leaks".

Page 13, paragraph 4.2.5, delete the next to last sentence in the first paragraph and insert in lieu thereof the following: "Cartridges shall be free of visible damage and shall produce satisfactory ballistic performance after this test."

Page 17, paragraph 4.2.8, in the last sentence, delete the words "or leaks".

Page 18, paragraph 4.3.7, change referenced paragraph "3.5.5" to read "3.5.6".
