MILITARY SPECIFICATION

IRON, MAGNETIC: BAR, SHEET, AND STRIP

Specification MIL-I-11695C(MR), dated 9 April 1969 is hereby reinstated based upon request received from the Naval Air Systems Command, dated 18 February 1977.

The specification was cancelled on 15 April 1976 because there were no producers of this material at that time.

As pointed out by the Naval Air System Command, there is still a demand for this material, and there is now at least one manufacturer willing to supply it.
