FEDERAL SPECIFICATION

PREPARATION FOR DELIVERY REQUIREMENTS FOR TABLES, STEEL, GENERAL OFFICE

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This specification covers the packaging, packing and marking requirements (see 6.1) for steel general office tables as covered by AA-T-91.

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issue in effect on the date of invitation for bids form a part of this specification to the extent specified herein.

Federal Specifications

L-P-378 - Plastic Sheet and Strip, Thin Gauge, Polyolefin.
AA-T-91 - Tables, Steel, General Office
NN-P-71 - Pallets, Material Handling, Wood, Stringer Construction, 2-way and 4-way (Partial)
QQ-S-781 - Strapping, Steel, Flat and Seals
UU-P-268 - Paper, Kraft, Untreated, Wrapping
PPP-B-636 - Boxes, Shipping, Fiberboard
PPP-F-320 - Fiberboard; Corrugated and Solid, Sheet Stock (Container Grade), and Cut Shapes
PPP-S-760 - Strapping, Nonmetallic, (And Connectors).

Federal Standards

Fed. Std. No. 123 - Marking for Domestic Shipment (Civil agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly suppliments as issued, is for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington, DC 20402.

(Single copies of this specification and other Federal Specifications required by activities outside the Federal Government for bidding purposes are available without charge from Business Service Centers of the General Services Administration Regional Offices in Boston, New York, Washington, DC, Atlanta, Chicago Kansas City, MO, Fort Worth, Denver, San Francisco, Los Angeles, and Seattle, WA.

(Federal Government activities may obtain copies of Federal Specifications, Standards and Handbooks and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

Military Standards:

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage

(Copies of Military Specifications and Standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on the date of invitation for bids or request for proposal shall apply.

National Motor Freight Traffic Association, Inc., Agent:

National Motor Freight Classification.

(Application for copies should be addressed to the American Trucking Association, Inc., Tariff Order Section, 1616 P. Street, N.W., Washington DC 20036.)

Uniform Classification Committee, Agent:

Uniform Freight Classification.

(Application for copies should be addressed to the Uniform Classification Committee, Rm 1106, 222 South Riverside Plaza, Chicago, IL 60606.)

3. REQUIREMENTS

3.1 General. The tables shall be packaged, packed and shipping containers marked using the materials specified herein and in the applicable reference documents. Materials used but not covered by reference specifications shall be free from all defects and imperfections which may effect their serviceability.

3.2 Packaging. Packaging shall be level A or C as specified (see 6.2). All sizes and classes of tables shall be supplied in a "Knocked-down" condition for packaging.

3.2.1 Level A.

3.2.1.1 Legs.

3.2.1.1.1 Size 1 and 2 table legs. The legs shall be removed and the assembly hardware placed in a cloth drawstring bag or a sealed plastic bag. Each leg shall be wrapped in not less than one thickness of fiberboard conforming to PPP-F-320, class-domestic. The fiberboard wrap shall be secured with pressure sensitive adhesive tape. The length of the closed package shall be such as to prevent movement when packed in accordance with 3.3.1.

3.2.1.1.2 Size 3 table legs. The legs shall be removed and the assembly hardware placed in a cloth drawstring bag or a sealed plastic bag. Each leg shall be wrapped in a sheet of 40 pound basis weight kraft paper conforming to UU-P-268 and packaged in pairs, in a single thickness of fiberboard conforming to PPP-F-320, class domestic. The fiberboard wrap shall be secured with pressure sensitive adhesive tape. The length of the closed package shall be such as to prevent movement when packed in accordance with 3.3.1.

3.2.1.2 Drawer. The drawer pull shall be secured to the inside of the drawer using the screws or nuts supplied for final mounting. The drawer shall then be immobilized using metal drawer clips to preclude opening or damage while in transit or storage. Metal drawer clips shall be provided with cushioning to prevent the surface of the drawer front. Alternatively, the drawers shall be immobilized by using cellulosic wadding strips. The strips shall be secured in place with pressure sensitive adhesive tape.

3.2.1.3 Table top. The table top shall be covered with a sheet of plastic film conforming to L-P-378, type I, grade A, finish 1. This material shall be a minimum of .0015 inches thick and shall be secured in place with pressure sensitive adhesive tape.

3.2.2 Level C. The tables shall be packaged to insure protection during shipment and safe delivery at destination.

3.3 Packing. Packing shall be level A, B or C as specified (see 6.2).

3.3.1 Level A. The complete disassembled table, prepared as specified in 3.2.1 shall be packed in a close-fitting box conforming to PPP-B-636, style FTC, grade V3C or V3S. The arrangement of the components within the box shall be as shown in Figures 1, 2 or 3 as applicable. Each pack shall be provided with two edge protectors as shown in Figures 1, 2 or 3 as applicable. The material for the edge protectors shall conform to PPP-F-320, class domestic, variety DW, grade 350. The dimensions for the edge protectors shall be as shown in Figure 1, 2 or 3, as applicable. The bag containing the assembly hardware shall be secured within the drawer with pressure sensitive adhesive tape to prevemt movement or loss of the parts during shipment and storage. Cushioning material conforming to PPP-C-843 and fiberboard, conforming to PPP-F-320, type CF, class domestic, shall be used as required to prevent movement of legs within the package during shipment and storage. The box shall be closed, waterproofed sealed and strapped in accordance with the appendix to PPP-B-636.

Check the source to verify that this is the current version before use.

3.3.2 Level B. The complete disassembled table prepared as specified in 3.2 shall be packed as specified in 3.3.1 except that the box shall conform to PPP-B-636, class domestic, style FTC, type CF or SF, class domestic, grade 275 minimum, and the closure shall be in accordance with method II of the appendix to PPP-B-636.

3.3.3 Level C. The complete disassembled table, prepared as specified in 3.2.1 shall be packed to comply with the National Motor Freight Classification rules or the Uniform Freight Classification rules.

3.4 Palletization. Unless otherwise specified (see 6.2), 10 tables packed as specified in 3.3 shall be palletized on a pallet conforming to NN-P-71, type II, with the following exceptions: (a) the width and length of the pallet shall be equal to the respective outside length and width of the shipping boxes; (b) the pallet shall be furnished with five stringers which shall run perpendicular to the width dimension of the pallet as shown in Figure 2 of NN-P-71; (c) the spacing between the top deckboards shall be not more than 3 inches. The load shall be secured to the pallet with a minimum of 3 straps running perpendicular to the pallet width and 2 straps running perpendicular to the pallet length. The strapping shall conform to QQ-S-781, type I, minimum size 3/4 x .020 inch; or PPP-S-760, type II or III, minimum size ½ x .030 inch.

3.5 Marking. In addition to the special marking required by 3.5.3, the marking shall be in accordance with 3.5.1 or 3.5.2 as specified (see 6.2).

3.5.1 Civil agencies. Marking shall be in accordance with Fed. Std. No. 123.

3.5.2 Military agencies. Marking shall be in accordance with MIL-STD-129.

3.5.3 Special marking. In addition to the marking required by 3.5.1 or 3.5.2, arrows shall be placed on the sides of each shipping container to indicate the position in which the shipping container shall be handled during shipment. The word "UP" shall be placed adjacent to the arrows in characters a minimum of two inches high. One side panel of each shipping container shall be marked as follows:

UP FURNITURE UP

FRAGILE - HANDLE WITH CARE

The top panel of each shipping container shall be marked as follows:

FURNITURE

FRAGILE - HANDLE WITH CARE

TOP

THIS SIDE UP

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that such supplies and services conform to prescribed requirements.

4.2 Inspection. An inspection shall be made to determine whether the packaging, packing and marking comply with the requirements of section 3 of this specification. Defects shall be scored in accordance with table I. For inspection of interior packaging, the sample unit shall be one shipping container fully prepared for delivery, selected at random just prior to the closing operations. Sampling shall be in accordance with MIL-STD-105. Defects of closure listed shall be examined on shipping containers fully prepared for delivery. The lot size shall be the number of shipping containers in the end item inspection lot. The inspection level shall be S-2 with an AQL of 4.0 defects per hundred units.

TABLE I. Classification of defects

Examine	Defects
Markings	Omitted; incorrect; illegible; improper size, location, sequence, or method of application.
Material	Any component missing, damaged, or not conforming to the applicable specification or requirements stated herein.
Workmanship	Inadequate application of components such as incomplete closure of container flaps, loose strapping, inadequate stapling, or distortion of container.
Contents	Quantity per container is more or less than required. Gross weight excedes the requirements of the box specification.

5. PREPARATION FOR DELIVERY
(Not applicable)

6. NOTES

6.1 Intended use. It is intended that this specification be used in section 5 of commodity specifications listed in section 1 of this specification and for direct reference in procurement documents.

6.2 Ordering data. Purchasers should select the proper options permitted herein and include the following information in procurement documents:

(a) Title, number and date of this specification.
(b) Levels of packaging and packing required (see 3.2 and 3.3).
(c) When palletization is not required (see 3.4).
(d) Whether civil or military marking is required (see 3.5).
(e) Type or style of table to be packaged and packed (see 1.2).
