COMMERCIAL ITEM DESCRIPTION

COVER, HEADREST (Plastic, Disposable)

The General Services Administration has authorized the use of this commercial item description

This commercial item description covers a disposable plastic headrest cover suitable for use on an operative chair.

Salient characteristics:

Material. The headrest cover shall be fabricated of seamless, thin gauge, polyethylene flat film tubing conforming to Type I, Grade B or C, Finish 1 of L-P-378. Polyethylene shall contain anti-static material which inhibits the attraction for dirt. The polyethylene film shall be 0.00075 plus 0.00024 minus 0.00011 inch thick and shall conform to the physical requirements for film 0.0010 inch thick as specified in table I of L-P-378, except the ultimate elongation in the machine direction shall be a minimum of 150 percent. Only those physical requirements for density, impact resistance, tensile strength, ultimate elongation, and slip shall apply.

Style, design and dimensions. The disposable plastic headrest cover shall be suitable for slipping over and being retained on the headrest of dental, eye, ear, nose, and throat, and optometric chairs. The headrest cover shall serve as a protective barrier against cross-contamination by providing a clean, fresh environment for each patient. The headrest cover shall be in accordance with figure 1 for design and dimensions. Each cover shall be open from the top to the bottom across the entire flat diameter, except for the heat seal band near the bottom. The cover shall be furnished in a continuous tear-off-type roll of a minimum of 500 separate covers. Each cover in the roll shall be separated from the cover preceding and following it by continuous perforations as shown in figure 1. Perforations shall permit detachment of each cover from the roll by gentle pull without tearing or permanent deformation. The roll shall be wound on a hollow, heavy duty, cardboard cylinder core conforming to figure 2 for design and dimensions.

Color. The headrest cover shall be colorless, biscayne blue, or aqua green. Colorless plastic shall be transparent and colored plastic shall be translucent.

Workmanship. The headrest cover shall be uniformly constructed and shall be free from holes, dirt, blister, wrinkles, tears, heat seal breaks, and other defects which may detract from its appearance or impair its serviceability.

AMSC N/A FSC 7290

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Unit. Roll (RO). A continuous tear-off-type roll of a minimum of 500 separate covers, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for inspection. Sampling for inspection shall be conducted in accordance with MIL-STD-105. Where feasible, the same sample shall be used for the determination of two or more inspection characteristics. The unit of product for inspection purposes shall be one roll of headrest covers. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, AQL 2.5, and sampling for tests (when applicable) shall be conducted at inspection level S-1, AQL 1.0.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conform to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Number is covered by this document:

National Stock Number	Item Identification
7290-00-890-1822	COVER, HEADREST, Plastic, Disposable, 500s: Tear-off Roll, Continuous.

Ordering data. Intermediate/exterior package quantities, labeling, and marking must be as specified in the contract and/or order.
