COMMERCIAL ITEM DESCRIPTION

DISPENSER, DENTAL FLOSS

The General Services Administration has authorized the use of this commercial item description in preference to Military Specification MIL-D-36242A.

This commercial item description covers a dental floss dispenser suitable for accommodating dental floss.

Salient characteristics:

The floss dispenser shall consist of a plated, die cast, zinc alloy base, a corrosion-resisting steel cover plate, and a non-skid sponge rubber pad bonded to the base. The cut-off slots shall be sufficiently sharp to provide a clean cut of the floss. The dispenser shall accommodate two wound spools (cores) of dental floss, with a cylindrical core of 2-3/4 ± 1/16 inches in length and 5/16 ± 1/32 inch in diameter, and the maximum diameter of dental floss, including the core, shall be 1-1/8 inches.

Construction. The cover shall be a snap-on type and the rubber pad shall be centered on the bottom.

Material. Material shall be of the highest quality throughout, and shall be suitable in all respects for the intended purpose.

Finish. All exterior surfaces of the base shall be chromium over nickel over copper plated. The cover plate shall have a No. 3 satin commercial stainless steel finish. The rubber pad shall have a smooth, trimmed flat, non-skid surface.

Workmanship. Dispenser shall be free from burs, cracks and rough edges, which may detract from its appearance or impair its serviceability.

Unit. Each (EA). One dispenser, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for inspection. Sampling for inspection shall be conducted in accordance with MIL-STD-105. Where feasible, the same sample shall be used for the determination of two or more inspection characteristics. The unit of product for inspection purposes shall be one dispenser. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, AQL 2.5, and sampling for tests (when applicable) shall be conducted at inspection level S-1, AQL 1.0.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specification, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.
